Redefining a hard days work

SNICKERS WORKWEAR is forward thinking and solution driven. Innovation is a hallmark of our products, and we start with real-world challenges. They are our roadmap to developing workwear with better functionality, durability and safety. Workwear that makes a hard day's work easier.

Our commitment extends beyond creating functional, durable and stylish solutions; we aim to revolutionise the workwear industry with a focus on sustainability, where durability becomes our guiding principle.

When you put on Snickers Workwear trousers or a jacket, you are at the forefront of your industry. It's based on our heritage of 50 years of innovation, proven time and time again in our products.

SINCE 1975, Snickers Workwear has redefined workwear to help craftspeople overcome challenges. The idea of workwear as a way to enhance performance was born, and it's been our main driver ever since. Snickers Workwear has introduced a long line of groundbreaking innovations to make workwear more durable, functional, safe and comfortable. Things like tool pockets, holster pockets, tool vests, stretch fabric, KneeGuard System and trouser reinforcements are probably considered generic workwear today. But now you know who introduced them. And where to look for the next big thing in workwear.

1975

WORKWEAR

YEARS of INNOVATION

INVENTING WORKWEAR

Capsulized™

World's first built-in certified kneepads.

Capsulized is one of our latest innovations: a pair of premium, slim-fit stretch trousers with the world's first integrated and certified knee pads. These trousers offer unrivalled comfort and freedom of movement and are available with or without holster pockets.

Three years of research and development went into creating these revolutionary work trousers. The result combines advanced sportswear technology with our proven workwear expertise to provide flexible, durable and certified knee protection for craftspeople on the move.

INVENTING WORKWEAR

Q Heat

Pro level heated workwear

Our latest addition to improving workdays
We're taking heated wear to the next level
by adapting the technology to professional
standards. As the first workwear brand
to take a holistic approach to heated wear,
we're launching four different heated
garments: gloves, socks, a regular vest
and a mini vest. We call it Q Heat.

Q Heat keeps you warm, but it's also about being
unrestricted in situations where traditional layering
isn't an option — in mines, narrow house grounds,
at heights or other situations where you need to
be tactile. A true example of how innovative
workwear can enhance performance!
And like all our products, it's engineered for
functionality, durability and safety.

INVENTING WORKWEAR

Polartec® Shed Less

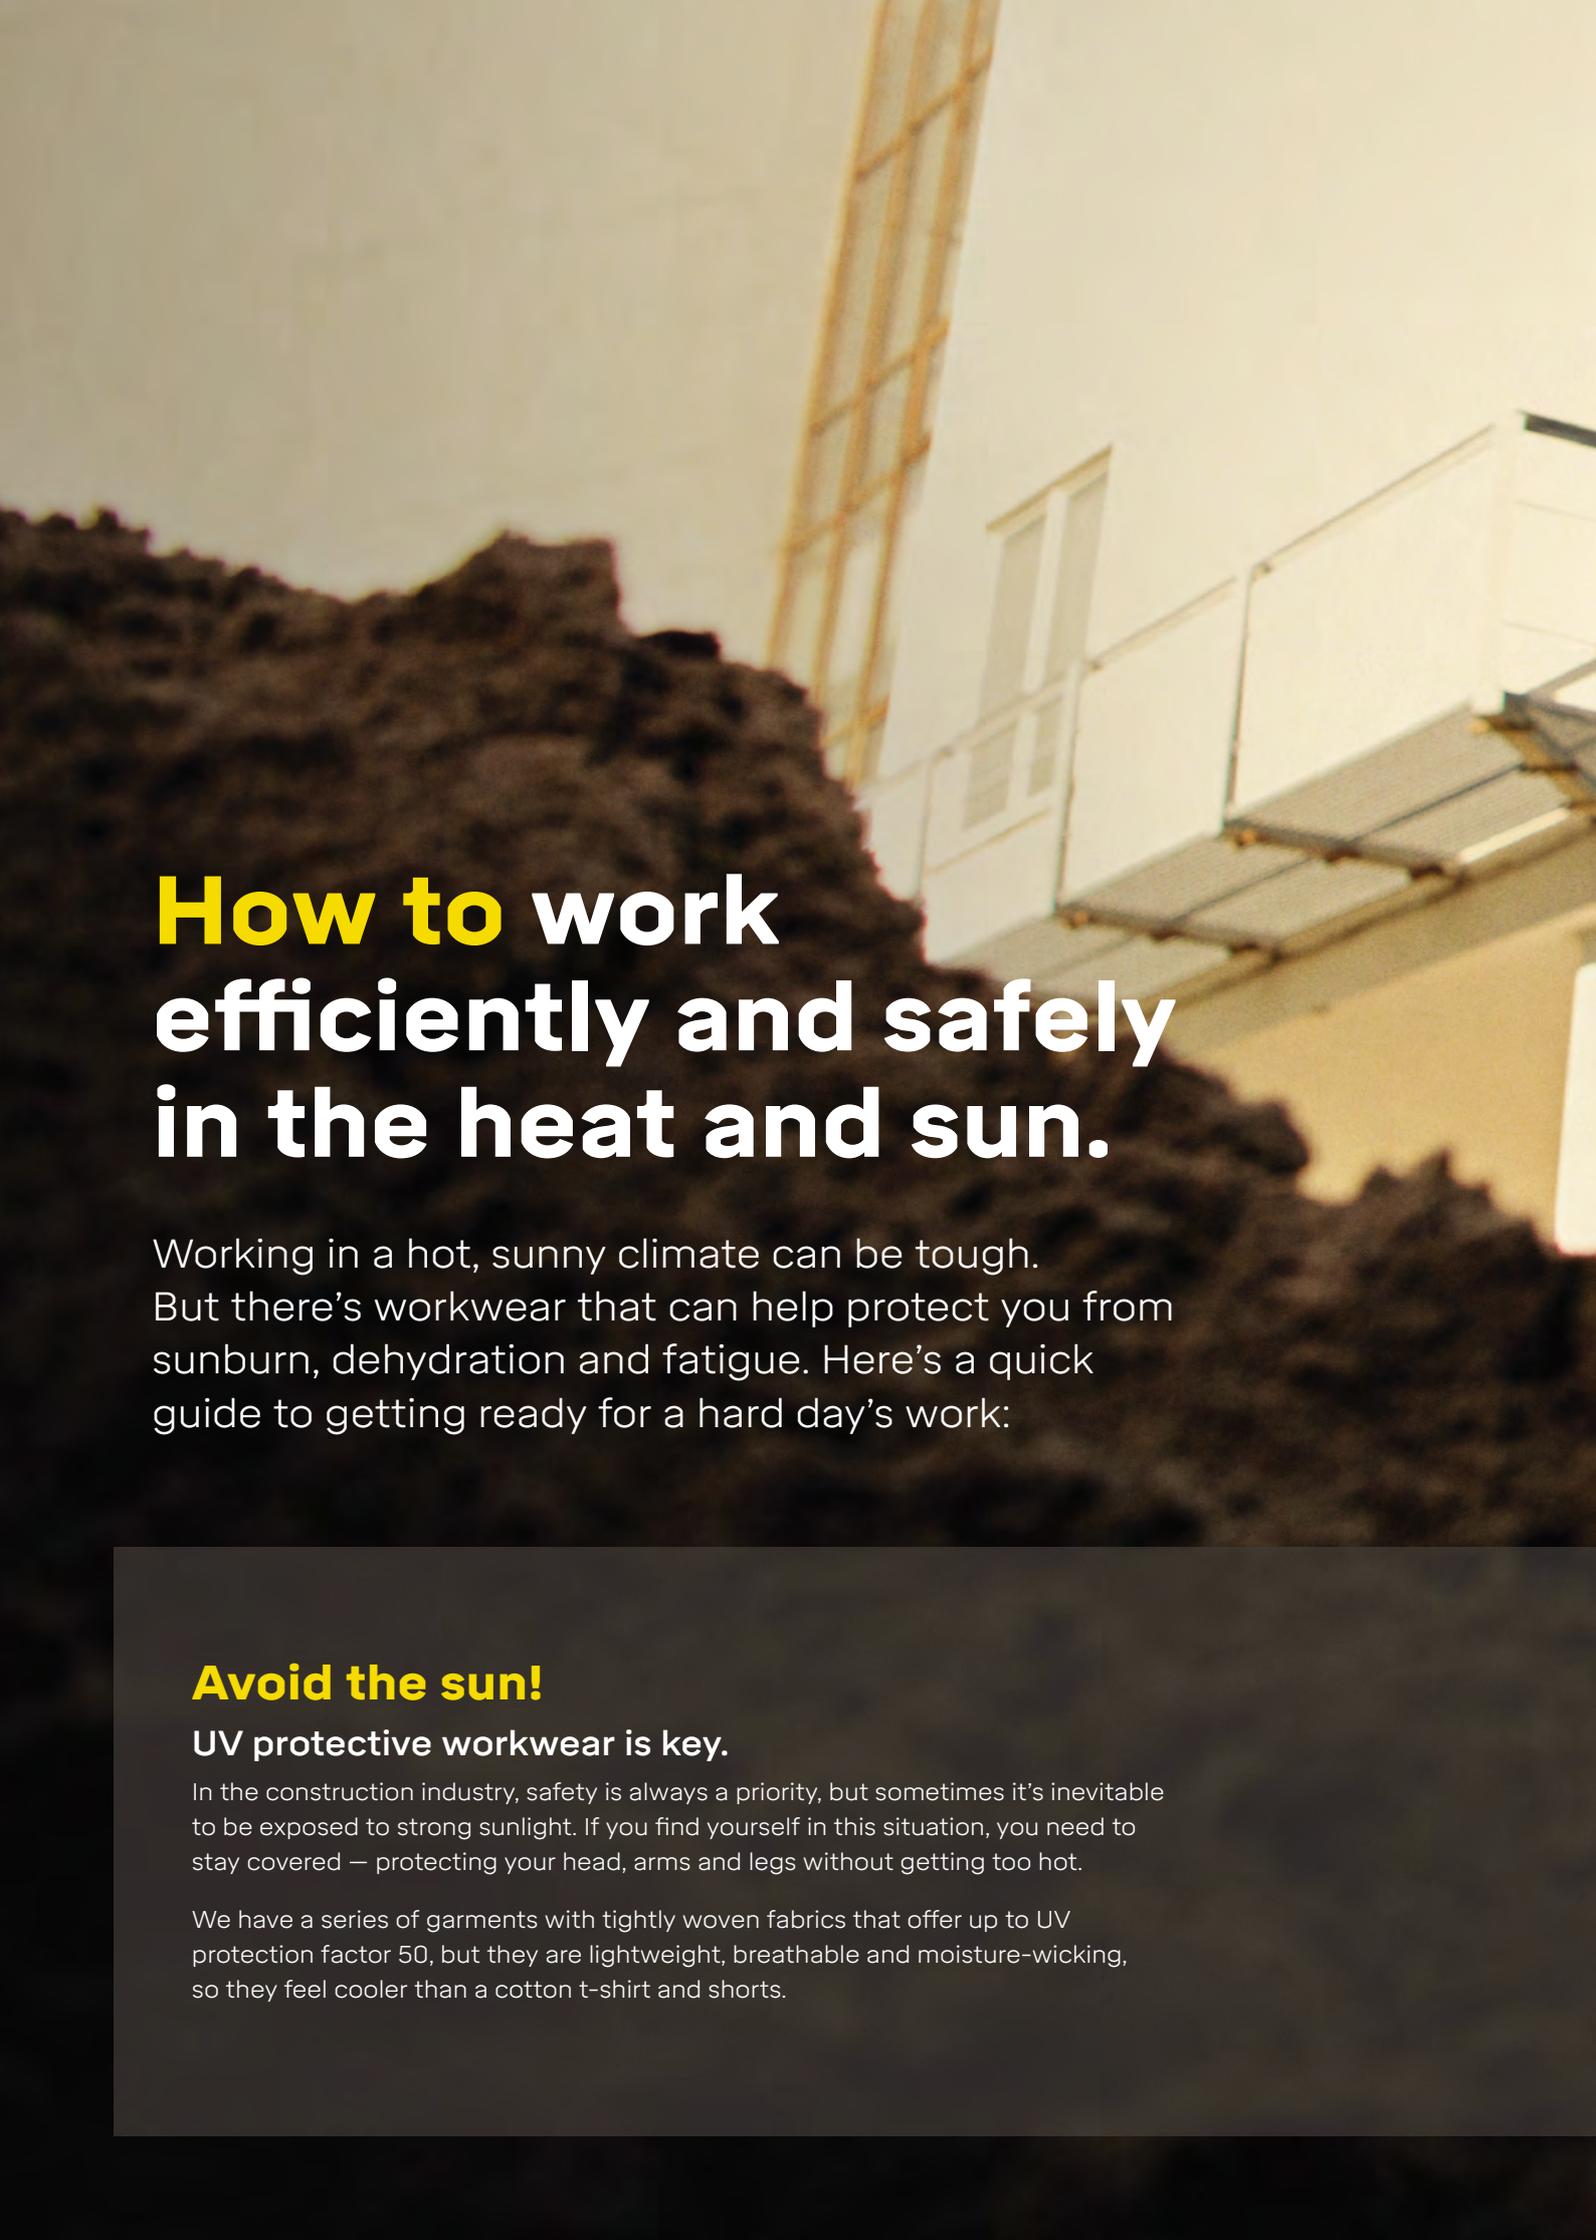

A micro revolution for the work fleece

Snickers Workwear is committed to sustainability. By partnering with forward-thinking companies, we can continue to reduce our environmental impact. That's why we're excited to introduce POLARTEC® Shed Less fleece — a fabric that releases 85% less microfiber into the environment when washed, drastically reducing water and air pollution. We are proud to be the first workwear brand to use this innovative fabric in our fleece jackets.

POLARTEC® Shed Less fleece offers all the warmth, comfort, breathability and durability of the original fleece. And it stays the same, wash after wash, without becoming rugged and worn. It is truly a micro-revolution for both the environment and the beloved work fleece!

How to work efficiently and safely in the heat and sun.

Working in a hot, sunny climate can be tough. But there's workwear that can help protect you from sunburn, dehydration and fatigue. Here's a quick guide to getting ready for a hard day's work:

Avoid the sun!

UV protective workwear is key.

In the construction industry, safety is always a priority, but sometimes it's inevitable to be exposed to strong sunlight. If you find yourself in this situation, you need to stay covered — protecting your head, arms and legs without getting too hot.

We have a series of garments with tightly woven fabrics that offer up to UV protection factor 50, but they are lightweight, breathable and moisture-wicking, so they feel cooler than a cotton t-shirt and shorts.

Stay cool and dry!

Lightweight and ventilated fabrics.

Staying hydrated is obviously the most critical thing. But as the temperature rises, it's also essential to dress correctly. Lightweight fabrics and materials offer better ventilation and dry faster when wet from perspiration.

Our LiteWork range of workwear is specifically designed for warmer climates using specially selected, durable yet lightweight fabrics. Examples include the 37.5® technology in our workwear. Active particles help your body maintain an ideal core temperature by removing perspiration vapour before it turns into liquid sweat.

How to layer work clothes in wet and cold weather

Craftspeople who work outdoors during the wet and cold seasons face unique challenges, requiring durable and functional layering solutions to stay warm, dry, and comfortable while maintaining productivity. Here's a quick guide to combining waterproof work jackets with mid layers and a moisture wicking base layer.

Base layer

Moisture-Wicking

The most important feature for your base layer is to wick moisture away from your body, keeping you dry and comfortable. Things to consider when you choose base layer is your activity level and the temperature your working in. Materials like wool or synthetic fabrics is great for their moisture-wicking properties. Avoid cotton as it traps moisture, leaving you cold and damp.

Mid layer

Insulation

The main purpose of mid layers is to insulate and trap heat. We recommend fleece or synthetic jackets, which are lightweight and retain their thermal properties even when wet. Choose the thickness of your mid layer according to the temperature and your level of activity. The midlayer is the key to good layering, as it can act as an outer layer if you get too warm in dry conditions, or be removed in wet conditions.

Outer layer

Waterproof and Windproof Shell

The outer layer is your barrier against wind and rain, and the most important layer to stay comfortable in wet and cold conditions. A water resistant jacket will keep you dry unless you're working for hours in heavy precipitation, in which case you'll need a waterproof jacket with taped seams to keep water out. In freezing temperatures you should opt for an insulated and water resistant outer layer with high neck and adjustable hood and cuffs.

SNICK

LEVI'S

Durability means sustainability

The longer our clothes last, the less environmental impact they have. This simple, fundamental insight is the cornerstone of our sustainability efforts and influences everything we do.

We have always believed in making hard-working, long-lasting workwear. And we're committed to continue doing so, in close collaboration with our production facilities where we work with continuous improvements for both social and environmental accountability. All while working to reduce our carbon footprint.

We're working hard on our sustainability. We're also committed to the UN Paris Agreement, and are always looking for ways to improve everything we do. We've structured our sustainability efforts in three main areas.

DESIGN — How we choose materials and design our clothes for long-lasting durability and hard-working functionality.

PRODUCTION — How we behave as a company, setting standards for our suppliers to ensure that our clothing is made responsibly.

COLLABORATION — How we team up with our partners and customers, working together to promote sustainable business practices and circular behaviour.

Tackling sustainability challenges takes hard work. But it's work that we believe is well worth doing. For ourselves, the people we work with, and the world around us.

Inventing workwear

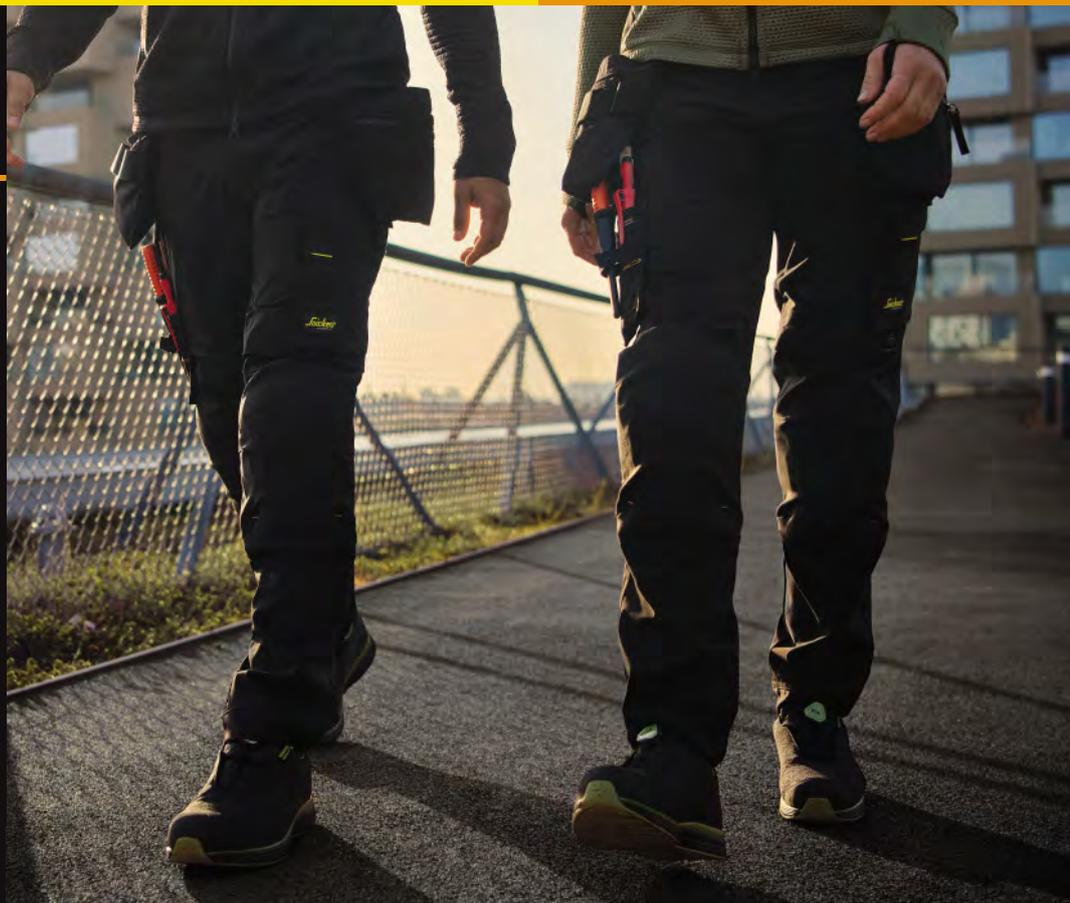

Trousers that work as hard as you.

For many hard-working craftsmen and craftswomen, dependable trousers are one of their most important tools. But we all know that different jobs demand different tools. That's why we've created different collections depending on the job you do. Each is purposefully designed to be the right garment for the conditions and tasks at hand.

AllroundWork

Ready for work, any day of the week.

With an emphasis on durability, comfort and functionality, this collection is an excellent and safe choice for everyday use.

LiteWork

Durable comfort in hot and humid environments.

When temperatures soar, you need moisture-wicking, quick-drying, ventilated UV-protection to stay dry, cool, and safe.

Not sure which size to choose? Check out our size guide on pages 248-250. To learn more about our three different fits – slim, regular, and loose – plus our wide range of sizes, see page 24-25.

FlexiWork

A comfortable fit in any working position.

Designed for jobs that demand lots of physical flexibility while still delivering extreme durability with the best possible fit.

Find your fit.

The right fit and size is a matter of safety, comfort and protection. If the work trousers don't have the right fit for your body type, or are too big or small, your kneepads will not stay in the right position to protect your knees. Since our bodies are all different, Snickers Workwear offers three different fits – Slim fit, Regular fit and Loose fit – as well as one of the widest size ranges in the industry. With 70 different trouser sizes available, you can be sure to find a pair that fits your body perfectly, ensuring optimal protection.

Snickers Workwear offers one of the widest selections of sizes available in the industry. 70 sizes of trousers with five different leg lengths! So whether your legs are short or long, we've got just the trousers for you. Special sizes are also available. Delivery may take slightly longer, but it's definitely worth the wait.

Slim.

Slim fit garments are figure-hugging and quite tight, giving you a slimmer look. However, they are also soft, stretchy and follow your every move.

Loose.

The loose fit garments sit securely at the waist while the legs are wider and airier. All trousers in the 3-series have loose fit.

Regular.

The garments follow your body shape, but are not tight. There is room for air between the garment and your body.

6241 AllroundWork, Stretch Trousers Holster Pockets 6341 AllroundWork, Stretch Trousers

Stretchy and durable work trousers with holster pockets built for everyday use. Slim legs provide a clean look.

Multi-purpose work trousers made of stretch material. For enhanced flexibility and freedom of movement, the trousers feature pre-bent legs and 4-way stretch panels at back. CORDURA®-reinforced KneeGuard™ pockets offer additional protection and durability while reinforced holster pockets, ruler pocket and cargo pockets provide secure storage and easy access to tools. Slim legs.

- 2 and 4-way stretch materials
- Stretch CORDURA® at knees and crotch
- KneeGuard™ system (EN 14404)

Material: 100% Polyester, 190 g/m².

Fits with 8200 Rain Jacket, PU

You only have one pair of knees. Make sure they last a lifetime.

Did you know that craftsmen and craftswomen exert more pressure on their knees than many top athletes? That's why knee injuries are more common for trade professionals than for those in other occupations. So, whether you occasionally kneel indoors or spend extended periods on your knees, using the best possible kneepads are essential.

Always look for the KneeGuard™ or SquareFit™ symbol on your trousers to match them correctly with your KneeGuard™ or SquareFit™ kneepads.

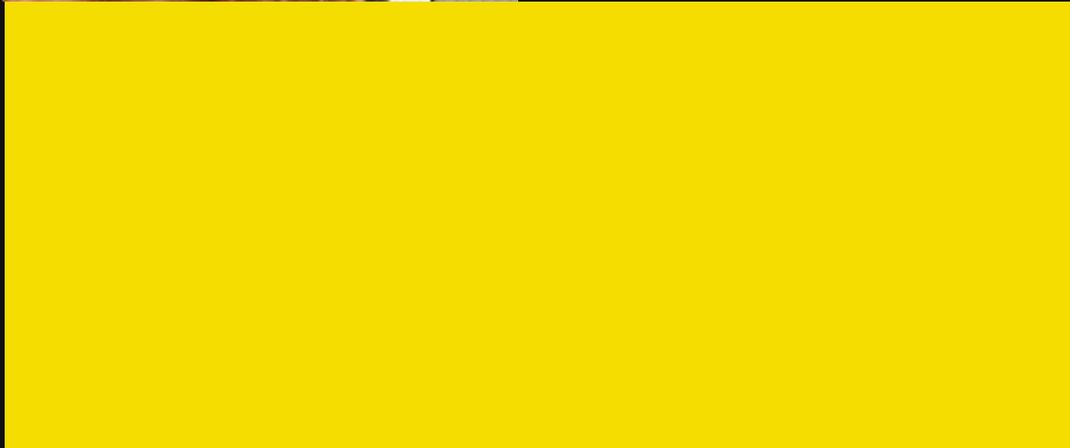

KneeGuard™

SquareFit™

At Snickers Workwear, we've developed three innovative kneepad systems that will shield you from both short- and long-term injuries: KneeGuard™, SquareFit™ and Capsulized™ — the world's first built-in certified kneepads.

0604

9122 Ergonomic Kneepads

Ergonomic kneepads offering advanced knee protection during work that involves frequent kneeling. A curved, lightweight and flexible design reduces strain and ensures everyday working comfort.

Lightweight kneepads with ergonomic shape offering advanced knee protection. With an EN 14404 Type 2 Level 1 certification, the kneepads are built for frequent kneeling in dynamic work environments, protecting against various debris on the floor. EVA material provides flexibility while a pre-curved design ensures the pads stay in place for continuous comfort. In addition, the pads provide great force distribution and penetration protection while they comfortably conform to the knees.

- EN 14404 Type 2 Level 1 knee protection
- Lightweight and flexible EVA material
- Ergonomic design for a tight and secure fit optimized for slim-fit trousers
- Compatible with the KneeGuard™ system
- Combination of different materials for force distribution and penetration protection

Size: One size

Material: 50% EVA, 50% polyethylene.

0604

9110 Craftsmen Kneepads

Kneepads offering advanced knee protection during work that involves frequent kneeling. Designed to reduce strain, the lightweight, flexible and durable kneepads provide everyday working comfort.

Lightweight kneepads featuring advanced knee protection and a comfortable fit. With an EN 14404 Type 2 Level 1 rating, the pads have been specifically designed for frequent kneeling in mobile work environments, guarding against pebbles and various debris on the floor. EVA material allows for a lightweight and flexible construction to ensure the kneepads are comfortable and easy to wear. In addition, a soft interior conforms to the knee, keeping the kneepads in place and distributing the pressure evenly while kneeling.

- EN 14404 Type 2 Level 1 knee protection
- EVA construction
- Lightweight and flexible design
- Compatible with the KneeGuard™ system

Size: One-size

Material: 50% EVA, 50% polyethylene.

9169 D3O® Ergo Craftsmen Kneepads

0500

Ergonomically shaped kneepads offering advanced knee protection for work that involves frequent kneeling. Designed for everyday use, the pads are made of durable D3O® material that provides enhanced impact protection.

Technically advanced kneepads with an ergonomic design ensuring that the pads are always in the right position for optimal knee protection. Made of durable and flexible D3O® material, the pads offer enhanced impact protection. The kneepads come with an EN 14404 Type 2 Level 1 rating to guard against pebbles, nails and various floor debris. In addition, the knee pads are machine-washable, which means you don't have to remove the pads when washing your work trousers. Designed to fit Snickers Workwear KneeGuard™ system.

- D3O® material for enhanced impact protection
- EN 14404 Type 2, Level 1 knee protection
- Retains shape for extended periods of frequent kneeling
- Ergonomic design for a tight and secure fit that matches perfectly with our Slim Fit trousers
- Compatible with the KneeGuard™ system
- Machine-washable

Size: One size

Material: 100% polyurethane.

9191 XTR D3O® Craftsmen Kneepads

0405

Advanced knee protection for work that involves extended periods of frequent kneeling. D3O® material retains the shape for long durations while offering extra impact protection. A lightweight design and supportive ventilation provide flexibility and comfort.

Craftsmen kneepads that feature advanced knee protection for extended periods of frequent kneeling. An EN 14404 Type 2 Level 1 rating guards against pebbles, nails and various debris during work that requires mobility. The pads are made of the innovative D3O® material that offers enhanced impact protection and retains its shape for long durations. In addition, a curved and highly durable construction ensures the kneepads stay securely in place for continuous comfort, while the interior conforms to the knee and distributes pressure when kneeling.

- EN 14404 Type 2 Level 1 knee protection
- D3O® material for impact protection
- Retains shape for extended periods of frequent kneeling
- Ergonomic design for stability and flexibility
- Durable and long-lasting design

Size: One-size

Material: 100% polyolefin and 100% D3O®.

1400

9112 D30® LITE Craftsmen Kneepads

Kneepads offering advanced knee protection during work that involves frequent kneeling. Designed to reduce strain during everyday use, the D30® LITE material provides impact protection, ventilation and a lightweight construction.

High-tech kneepads featuring advanced knee protection with enhanced impact protection. Boasting an EN 14404 Type 2 Level 1 rating, the pads have been specifically designed for frequent kneeling in mobile work environments, guarding against pebbles and various debris on the floor. D30® LITE material offers impact protection and shock absorption, while a curved, lightweight construction paired with a ventilating design ensures the kneepads are comfortable and easy to wear. In addition, a soft interior conforms to the knee, keeping the kneepads in place and distributing the pressure evenly while kneeling.

- EN 14404 Type 2 Level 1 knee protection
- D30® LITE material for enhanced impact protection
- Ergonomic design for ventilation and stability
- Curved, lightweight design
- Durable and long-lasting design

Size: One-size

Material: 100% polyolefin polymer blend.

0404

9116 ProtecWork, Kneepads FR

For full protection against heat and flame, wear these flame-retardant kneepads together with our trousers. The advanced kneepads feature vertical and horizontal cut lines for optimal flexibility and fit during intense work.

Advanced kneepads offering certified flame resistance and knee protection for safe work in high-risk environments. The kneepads are certified according to EN ISO 14116 and come with an EN 14404 Type 2 Level 1 rating to guard against pebbles, nails and various floor debris. In addition, the multilayered kneepads are made of a soft and comfortable rubber material laminated with CORDURA® for extra durability. The pads also feature vertical and horizontal cut lines to ensure a flexible fit that adapts to the moving body. Compatible with the KneeGuard™ system.

- Soft and comfortable material
- Laminated with CORDURA® for extra durability
- Horizontal and vertical cut lines for a flexible fit
- Compatible with the KneeGuard™ system

Size: One size

Material: Main: 100% EPDM rubber. Reinforcement: 100% CORDURA®

0408

9118 Floorlayer Kneepads

Kneepads offering advanced knee protection during work that involves extended periods of kneeling. Polyethylene comfort beads ensure the pads keep their shape over time, while a lightweight and breathable design provides comfort and stability.

Floorlayer kneepads that provide advanced knee protection during extended periods of kneeling. The pads' EN 14404 Type 2 Level 1 rating ensures you stay protected during extended hours on your knees and while engaged in work that requires mobility. Polyethylene comfort beads provide a breathable and lightweight construction and retain their shape over extended periods of time for optimal protection. In addition, ergonomic design combined with a soft interior make sure the kneepads stay in place and that the pressure is distributed evenly.

- EN 14404 Type 2 Level 1 knee protection
- Polyethylene comfort beads retain shape for extended periods
- Lightweight and breathable design

Size: One-size

Material: Shell: 85% polyamide, 15% polyester. Filling: Expanded polypropylene beads.

0414

9119 D3O® Lite Floorlayer Kneepads

Advanced knee protection for work that involves extended periods of kneeling and repeated impacts. D3O® LITE material retains the pads' shape for long durations while offering enhanced impact protection.

Lightweight floorlayer kneepads with advanced knee protection designed for work that includes extended periods of kneeling. Boasting an EN 14404 Type 2 Level 1 rating, the pads guard against pebbles, nails and various debris during work that requires mobility. Made of the innovative D3O® LITE material, the kneepads offer impact protection and shock absorption while retaining its shape for long durations. In addition, a curved design ensures the kneepads stay securely in place, while the interior conforms to the knee and distributes pressure.

- EN 14404 Type 2 Level 1 knee protection
- D3O® LITE material for enhanced impact protection
- Retains shape for extended periods of work
- Ergonomic design for ventilation and stability
- Durable and long-lasting design

Size: One-size

Material: 100% polyolefin and 100% D3O® LITE.

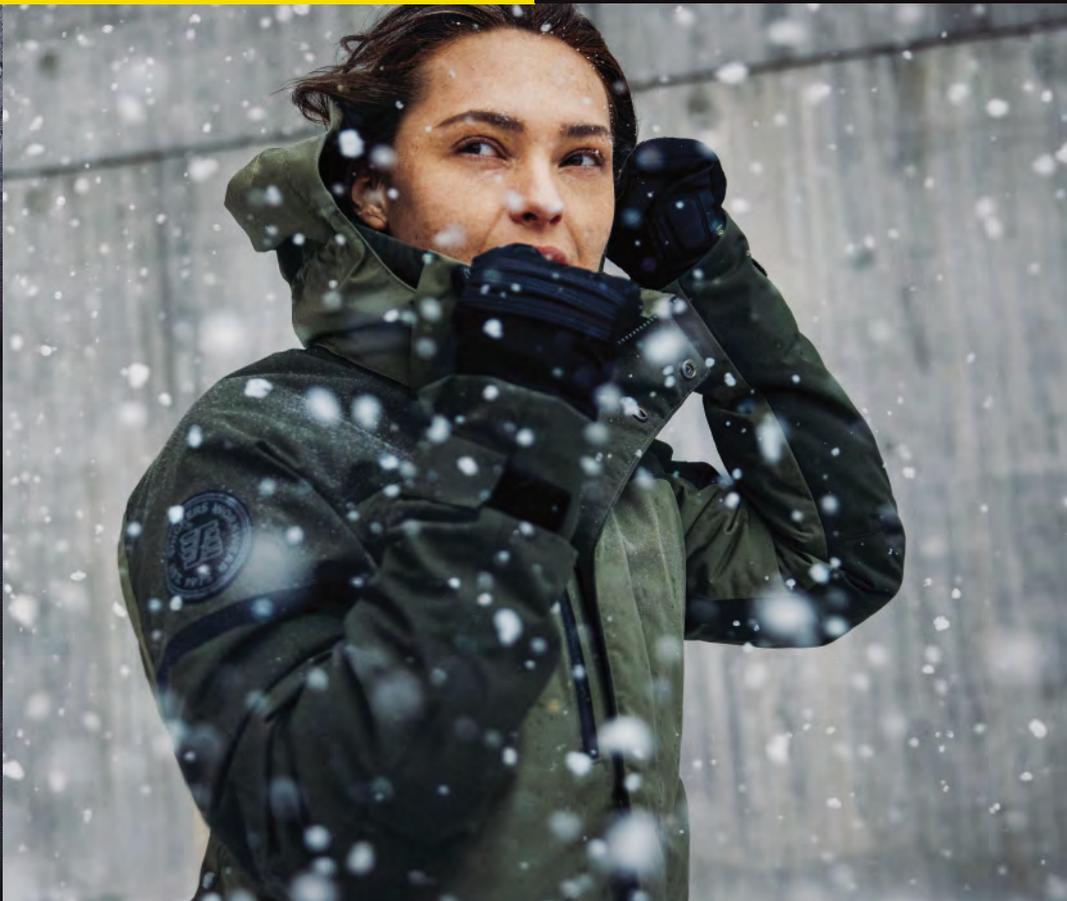

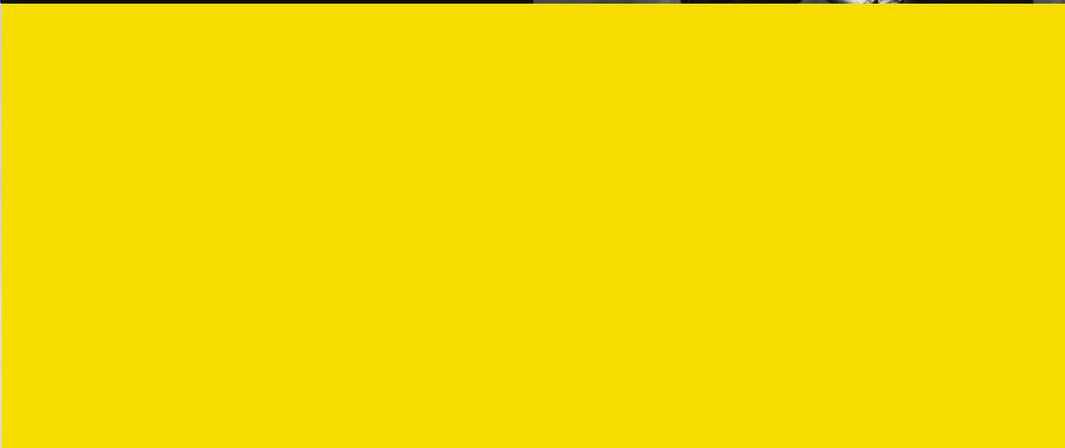

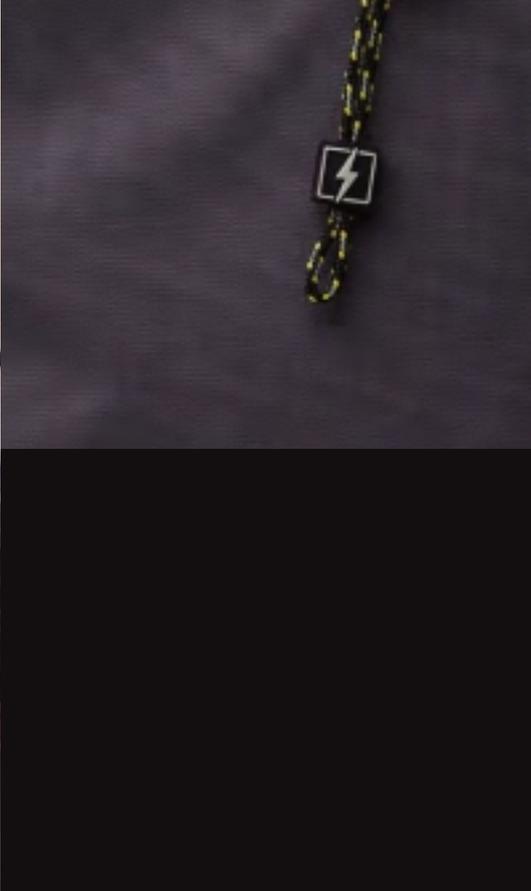

Jackets for any weather.

At Snickers Workwear, we're proud to create long-lasting jackets and vests that meet a variety of needs. Functional and innovative, they are crafted with smart details to ensure optimal performance. Whether you're looking for padded winter work jackets, versatile vests, softshells, or high-visibility garments, we offer a wide selection of models and sizes for both men and women.

Built to support you on the job in any environment, our range of jackets combine durability with supreme comfort.

1127 AllroundWork, Women's Waterproof 37.5® Insulated Jacket

A waterproof insulated work jacket designed especially for women to provide everyday comfort in cold and wet environments. Equipped with 37.5® Technology, taped seams and a detachable hood, this all-purpose work jacket is ready for anything.

The Women's Waterproof 37.5® Insulated Jacket has been constructed for everyday use to provide working comfort in cold and wet conditions. The work jacket features a waterproof design with taped seams and a detachable hood to protect the wearer in wet and rainy environments. 3D mesh lining in the back provides increased insulation and the 37.5® Technology offers ventilation to maximize overall working comfort. 2-way stretch panels in the rear ensure flexibility and Cordura® reinforcements around the elbows enhances durability for daily use.

- 37.5® padding and 3D mesh lining at the back
- Pre-bent sleeves and stretch panels at back of shoulder
- Dropped sleeve ends and dropped back for extra comfort

- Fleece-lined, wind-protective high collar and inner elastic cuffs with thumbholes
- Waterproof detachable hood, reflective details and zip chest pocket with attachment for ID badge

Fit: Regular

Size: XS-XXL

Material: Main: 100% polyamide, 220 g/m². Reinforcement: 100% polyamide CORDURA®, 205 g/m². Lining: 100% solution dyed polyamide 65 g/m². Cuff stretch: 90% polyester 10% elastane, 253 g/m². Insulation: 50% 37.5® polyester, 35% REPVEVE® recycled polyester, 15% polyester, 120 g/m². Mesh: 100% polyester, 367 g/m². Pocket lining: 100% polyester, 215 g/m².

1801 AllroundWork, Waterproof Insulated Parka

A waterproof and insulated parka with taped seams, built to provide comfort in cold and wet environments. Designed with reflective details, multiple pockets, a detachable hood, and a power pocket.

This versatile, waterproof parka is made with taped seams for cold and rainy days. It has CORDURA® reinforcements for durability and a mesh panel for breathability. Pre-bent sleeves and a 3D mesh panel provide flexibility, while a padded, detachable hood, fleece-lined collar, and inner cuffs with thumbholes add warmth. Designed with a Napoleon pocket, a power pocket to protect mobile devices, and reflective details for safety. Adjustable waist and hem for comfort. Suitable for profiling.

- Power Pocket with PrimaLoft Gold Aerogel insulation to extend cell phone battery life in cold conditions
- Multiple CORDURA® reinforcements for durability.
- Reflective details for visibility
- Exterior pockets: 1 zipped chest pocket with ID badge holder (same as the Power Pocket), 2 hand-warming zipped side pockets, 2 patch pockets, 1 Napoleon pocket with an internal pen pocket

- Interior pockets: 1 zipped pocket, 1 mesh side stow pocket, 1 additional stow pocket
- Made with a PFAS free DWR finish

Fit: Regular

Size: XS-XXXL

Material: Material: 100% recycled polyamide, 175 g/m². Reinforcement: 100% CORDURA® polyamide, 190 g/m². Insulation: 90% REPVEVE® recycled polyester, 10% recycled polyester, 160 g/m² in body, 140 g/m² in sleeves, 60 g/m² in hood. Lining: 100% polyamide.

1902 FlexiWork, Hybrid Jacket

REPREVE

Elastic and versatile work jacket that fills the gap between a sweatshirt and an insulated garment, making it a great choice for general construction work in various temperatures.

Multi-purpose work jacket made of flexible, wicking jersey fabric and Reprave® insulation at shoulders and upper body. The result is an elastic jacket that provides freedom of movement and extra warmth in critical areas for all types of work in a wide temperature span. The design of the sleeves provides enhanced mobility, which is extra useful during work that involves a lot of over-head arm movement.

- Reprave® polyester insulation in upper body
- Full-movement sleeves
- Hand-warming pockets with zippers

- Cuffs with thumb grip
- Elastic at bottom

Size: XS-XXXL

Material: Main: 100% polyamide, 69 g/m². Contrast: 64% solution dyed polyester, 30% viscose, 6% elastane, 380 g/m². Insulation: 90% REPVEVE® recycled polyester, 10% polyester, 120 g/m². Cuff stretch: 90% polyester 10% elastane, 253 g/m². Pocket lining: 100% polyester, 69 g/m².

Sustainability: Solution dyed / REPVEVE® recycled polyester

4902 FlexiWork, Hybrid Vest

REPREVE

Versatile vest that works both as an outer layer and as an insulating layer underneath a shell jacket, making it a clear choice for general construction work in various temperatures.

The unique combination of materials makes this vest suitable for work in a wide temperature span. Shoulders and upper body feature REPVEVE® insulation for warmth and wind protection, while the lower part is made of a flexible and ventilating jersey fabric for freedom of movement. This hybrid construction creates flexibility and at the same time provides extra warmth in critical areas.

- REPVEVE® polyester for insulation
- Zippered hand-warming pockets made of solution-dyed, recycled polyester fleece
- Two inner stow pockets with pen compartments on left side
- Adjustable elastic at bottom hem

Size: XS-XXXL

Material: Main: 100% polyamide, 67 g/m². Contrast: 64% solution-dyed polyester, 30% viscose, 6% elastane, 380 g/m². Insulation: 90% REPVEVE® recycled polyester, 10% recycled polyester, 120 g/m². Pocket lining: 100% recycled polyester, 69 g/m².

Sustainability: The REPVEVE® fiber, which is made from recycled materials, help us reduce our climate footprint without compromising on the strength or performance of the products. Solution-dyed details.

8019 AllroundWork, Midlayer Wool Full Zip Jacket

Warm and cozy wool blend jacket with a sporty outlook, reflective details and great warming features. The full zip is made of a soft, stretchy wool blend, clean surface and a sporty outlook with reflective details. This is as much a midlayer as a jacket, depending on the weather conditions.

Midlayer made of a wool blend quality with laser cut placket and reflective details. Jacket has a standing collar and 2 zip pockets at front. Reflective print on sleeve and placket gives an updated look. Wool has antibacterial qualities and is also water repellent which inhibits bacterial growth and thus bad odor. This midlayer in wool do not need to be washed frequently but can be weathered in damp weather with good results. Wool can absorb moisture and feel dry and heats even in humid conditions. You can also regulate the climate by opening or closing the zipper at front. The midlayer offers a smooth feeling and is a great choice for everyday use.

- Wool stretch mix for extra movement
- 2 zip pockets and elastic sleeve cuffs
- Soft flatlock seams
- Reflective print details on arm and placket
- Elastic drawcord in waist

Size: XS-XXXX

Material: 78% Wool, 19% Viscose, 3% Elastane, 350 g/m².

2527 AllroundWork, Wool T-Shirt

0400

2800

Soft and smooth t-shirt made of 100% merino wool that offers great durability and natural body temperature management. The tee has a casual design and works both as a base layer and outer layer on warmer days.

T-shirt made of 100% mulesing-free merino wool. Wool is a natural fiber and has antibacterial qualities due to the keratin. The fiber is also water repellent which inhibits bacterial growth and thus bad odor. Wool garments do not need to be washed frequently but can be weathered in damp weather with good results. Wool can absorb moisture and feel dry and heats even when it's humid. The garment offers a warm, smooth feeling and is a great choice for everyday use.

- 100% mulesing-free merino wool with calender finish
- Soft and durable material
- Soft flatlock seams
- Printed neck label
- Naturally anti-bacterial

Size: XS-XXXX

Material: 100% mulesing-free merino wool with calender finish, 160 g/m².

2427 AllroundWork, Wool Long Sleeve T-Shirt

2800

0400

Long-sleeve t-shirt made of 100% soft merino wool that offers great durability and natural body temperature management. The t-shirt has a casual design and works both as a base layer and outer layer on warmer days.

Smooth and comfortable long-sleeve t-shirt made of 100% mulesing-free merino wool, which is a natural fiber with the performance characteristics of a high-tech fiber. The garment offers a warm, soft feeling and absorbs moisture from the body without feeling wet. Since wool is self-cleaning, the long-sleeve t-shirt can be carried for several days without washing. A great choice for everyday use.

- 100% mulesing-free merino wool
- Soft and durable material
- Soft flatlock seams
- Printed neck label
- Naturally anti-bacterial

Size: XS-XXXX

Material: 100% mulesing-free merino wool with kalendar finish, 160 g/m².

9483 Seamless Base Layer, Heat Regulating Wool Top

Lightweight base layer top made from a wool blend with excellent moisture-wicking properties and warmth, perfect for cold-weather workdays.

Crafted from a blend of soft wool and polyamide, this seamless base layer top offers insulation, moisture transport, and comfort in cold conditions. Wool naturally resists odour and efficiently traps warm air close to the body. In contrast, polyamide effectively wicks away moisture and is gentle against the skin. Featuring a body-mapped design, it provides slight support and ventilation where it's most needed. Accented with decorative orange flatlock seams and a Snickers Workwear logo on the chest.

- Seamless slim-fit design
- Natural anti-odour properties
- Body-mapped design for support and ventilation
- Quick drying
- Fits both men and women with its seamless, adaptive design

Fit: Slim

Size: XS-XXL

Material: 58% polyamide; 40% wool; 2% elastane.

9804

9246 Wool CORDURA® Socks, 2-pack

Heavy-duty wool socks that combine great fit with CORDURA®-reinforced functionality. Put them on and experience superior warmth and durable working comfort in demanding environments.

These technically advanced work socks are made of a high-quality mulesing-free merino wool blend that keeps your feet warm and fresh during the entire workday. Terry-knit interior provides enhanced insulation and plush comfort while CORDURA® reinforcement at toes and heels adds durability. In addition, air channels and mesh structure in hot spots offer targeted ventilation for optimal comfort. Furthermore, elastic rib at arch and ergonomic left and right design ensures a perfect fit.

- Merino wool blend with terry-knit inside
- CORDURA®-reinforced toe and heel
- Mesh structure ventilation
- Elastic rib arch
- Ergonomic left and right fit

Size: 37-40, 41-44, 45-48

Material: 33% polyamide, 19% merino wool, 19% acrylic, 19% polypropylene, 8% CORDURA®, 2% elastane.

0400

9216 Wool Socks, 2-Pack

Thin and comfortable merino wool socks that keep your feet warm and fresh in all kinds of working conditions. 2-pack.

Socks that combine great fit and comfort with excellent functionality. The socks are made of mulesing-free merino wool and feature a mesh panel for enhanced ventilation, elastic construction for optimal fit, and reinforced toe and heel for extra durability.

Size: 37-40, 41-44, 45-48

Material: 34% merino wool, 34% acrylic, 31% polyamide, 1% elastane.

- Knitted and elastic rib at arch and shaft
- Mesh panel for enhanced ventilation
- Reinforced toe and heel
- Rib-knit cuffs
- Machine washable in 40 °C

9000 Tech Cap

Technical 6-panel cap made from a lightweight and durable woven fabric with 4-way stretch. Designed with mesh side panels for added ventilation and breathability.

Crafted from functional fabrics, this cap offers lightweight durability and a great fit. To ensure all-day comfort, it's designed with mesh panels for ventilation and an interior sweatband that helps absorb sweat. For visibility, the cap features reflective details around the brim and a reflective Snickers Workwear S-logo at the front. The back adjuster with Velcro allows you to easily adjust the fit of the cap. For sun protection, the fabric has been tested for UPF40+.

- Mesh panels for ventilation and breathability
- Velcro back adjuster for a customized fit
- Interior sweatband
- Snickers Workwear silicone badge
- Fabric has been tested for UPF40+.

Size: One size

Material: Main: 92% polyester, 8% elastane, 130 g/m². Contrast: 100% polyester, 130 g/m².

0000

9913 Wash-In Textile Waterproofing

Launched in collaboration with OrganoTex®, this is an easy-to-use, biodegradable, and PFAS-free treatment for reproofing water-repellent textiles. The treatment is not to be used on flame-retardant protective wear or other garments certified to PPE Regulation (EU) 2016/425 category III.

An effective treatment for restoring water-repellent properties to washed and worn garments without effecting their colour, texture, or breathability. Easily applied in short washing machine cycle, best results are achieved on synthetic materials such as polyester and polyamide. The treatment is not to be used on flame-retardant protective wear or other garments certified to PPE Regulation (EU) 2016/425 category III.

- Biobased and readily biodegradable according to OECD 301F.
- Free from fluorocarbons (PFC/PFAS), fossil-based polymers and synthetic waxes
- Eco-labelled with OEKO-TEX Eco Passport
- 500 ml bottle sufficient for 5 to 7 garments
- Safety data sheet is available upon request

0400

Perform and protect.

Your hands are your most important tools, but they are also the body part most exposed to injuries. With our wide range of advanced work gloves – designed for various specific needs – you can count on the ultimate combination of functionality, durability, protection and comfort. All our gloves are certified according to EN 388:2016 and have been developed in close collaboration with professional users.

Power.

The workhorse gloves for heavy-duty work like carrying, loading and tearing in tough environments. Sophisticated patterns and durable materials ensure superior performance, protection and comfort. Several styles feature knuckle protection.

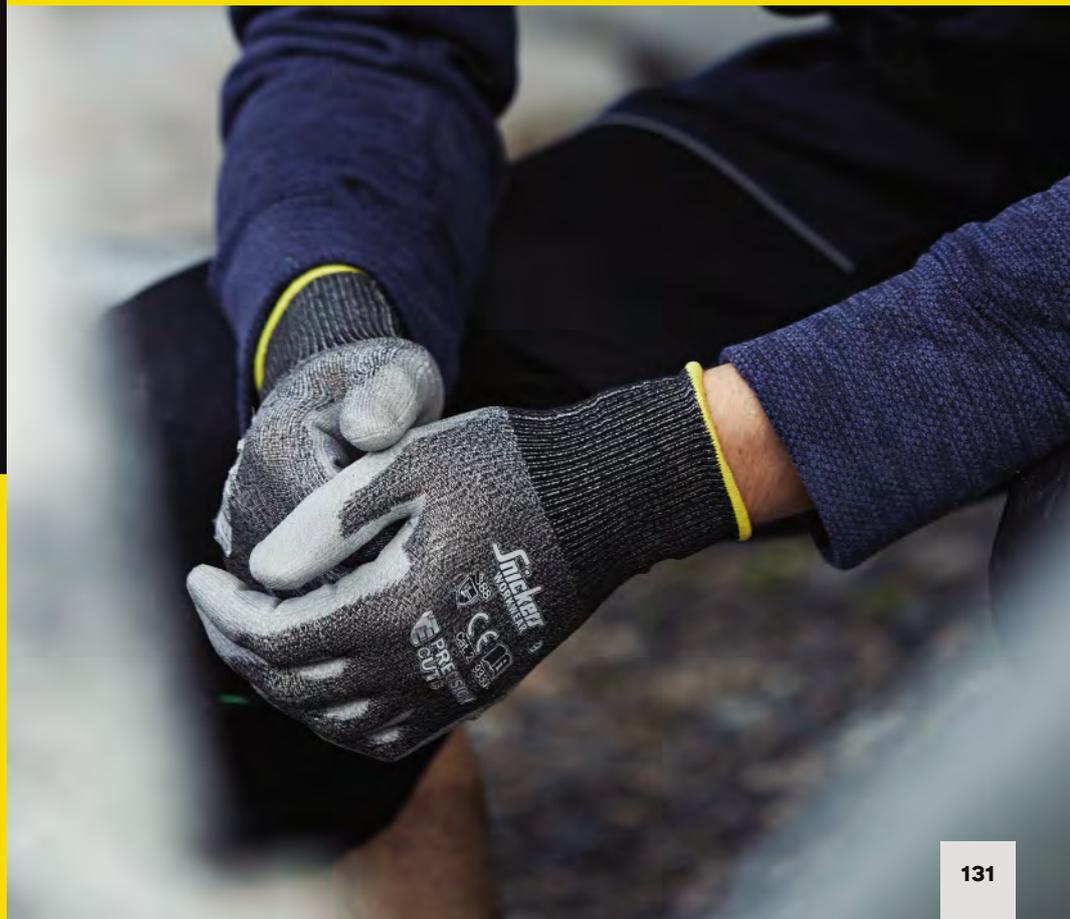

Weather.

Waterproof, padded and insulating gloves built for work in rough and cold weather. Advanced premium materials, such as Thin-sulate® and Hipora®, provide excellent dexterity, friction and grip even in wet, cold and slippery conditions.

Precision.

Thin, light and supple gloves with emphasis on dexterity and fit. Perfect for high-precision work. The flexible materials on the dorsal side of the hand, cushioning and reinforcement prints provide optimal protection and dexterity.

Safe & ergonomic tool carrying systems.

Snickers Workwear offers a choice of safe and ergonomic tool carrying systems that can be easily adapted to meet all needs. Choose between an ergonomic tool belt with leather pouches or durable textile pouches, or one of our tool vests with many smart features.

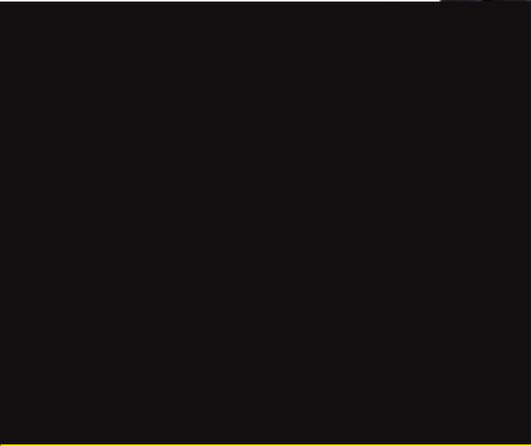

Flexi Attachment System.

This flexible system for attaching pouches onto Snickers Workwear toolbelts lets you add the pouches of your choice in any position.

Our sustainable leather pouches are truly flexible and can be attached either to your waist belt or to the work trousers' integrated tool holder.

Practical for all seasons. The tool vest is easy to adjust using a built-in expansion section on the front. This means it can be expanded and worn over a t-shirt, sweatshirt or even the thickest of winter jackets.

0404

4250 AllroundWork, Tool Vest

Versatile tool vest built for everyday use on the job. The vest provides durable and reliable tool-carrying functionality as well as plenty of options for practical storage.

Everyday use tool vest that offers excellent tool carrying and plenty of options for practical storage. The vest features mesh ventilation at the front that ensures efficient breathability during intense work. Wide and adjustable shoulder straps and an elastic at the back provide smooth comfort while an integrated belt reduces pressure on shoulders. In addition, an integrated inside expander makes it possible to wear the vest with or without a jacket.

- CORDURA® -reinforced pockets
- Mesh ventilation
- Integrated inside expander
- Wide adjustable shoulder straps
- Integrated belt

Fit: Regular

Size: S-XXXL

Material: Main: 69% polyamide, 31% cotton, 250 g/m². Reinforcement: 100% polyamide CORDURA®, 205 g/m².

0404

4254 Toolvest, Canvas+

Reinforced versatility. This hard-wearing Toolvest gives you easy access to your essential tools at all times. Count on ergonomic tool carrying and all the pockets you need combined with outstanding working comfort.

For the makers of tomorrow.

It takes a long time to master a craft. So, what better way than to start early? Snickers Workwear Junior garments are tough and durable so that they can withstand the wear and tear of games while at the same time providing great functionality for anyone taking their first steps as an apprentice.

The size span reaches all the way up to 164 (age 14), making it possible for older young people to also enjoy the benefits of our products.

Long sleeve cuffs that can be folded up or down as well as legs that can be adjusted in length are two smart features that allow some of the Junior styles to grow with the user – extending the garment’s lifespan.

Our latest addition to improving workdays. We call it Q Heat.

Discover Q Heat, our new collection of pro level heated workwear. Each garment in the collection features strategically placed heating panels for superior heat distribution. In addition, each garment has a detachable battery that fits into a riveted holder, making it easy to detach for washing and recharging.

The garment charges in just 2 hours and provides 2-10 hours of battery life, depending on the heat setting.

Q Heat features the market's thinnest heat panels with no cable joints to bend or break. The garment is washable, and the battery unit is water and dust-proof.

5401 Q Heat Mini Vest

Discover this comfortable mini vest, featuring advanced digital heat panels that provide a balanced heating ratio around the torso. Wear it under your midlayer to stay warm even in the coldest working conditions.

This warming vest, designed to prevent frostbite and minimize the need for bulky layering, has advanced digital heat panels strategically placed to maximize heat distribution around the torso. Batteries are located in the chest pocket on both sides for easy access. Heat settings can be controlled through an app or directly on the battery. For best results, wear the vest close to your body and under a jacket to create a thermos effect, which traps heat effectively and ensures maximum warmth when working in harsh conditions.

- Easy-to-use electronic heating
- Designed to fit multiple sizes
- Two outer zipped chest pockets
- Front YKK zipper
- Comfortably soft fabric
- Suitable for profiling

Size: ONE SIZE (fits XS-XL)

Material: Main quality: 88% polyester, 12% elastane, 218 g/m². Lining: 100% Polyester, 215 g/m².

5499 Q Inuheat One Powerpack

Inuheat One is the hub of the Heat Ready ecosystem. The smart electronics allow you to have and control the active heat in all different Heat Ready products.

The concept of a battery for several different applications is recognizable from, for example, modern hand tools available today. InuheatOne is designed and manufactured in Sweden to be the most advanced electronics for heat in clothing on the market today and it is made to work under extremely tough conditions. The current is transmitted via magnets instead of cord connections, which minimizes the risk of things breaking. The heat in the Heat Ready garments can either be controlled via the button on the power pack or via the user connecting InuheatOne to the associated smartphone application. In addition to the ability to control the heat, the user then also gets access to heat boost, information about the product it is heating, access to

premium support and much more. Faster charging than other heating systems on the market. The package includes two Inuheat One power packs, a charging adapter, a USB cable and an instruction manual.

- Powerpack for Heat Ready thermal socks and thermal gloves
Works with all Heat Ready products
- Designed and manufactured in Sweden
Faster charging than other systems on the market
- Pair it with Inuheat's smartphone app for more features
- Battery cell that maintains capacity even in cold conditions
- Easy to use

Size: One size

Make yourself seen.

When worksite visibility decreases, the risk for workplace accidents increase. That's the reason why we work so hard developing and improving our wide range of hard-working, high-visibility workwear.

Read more about EN and ISO standards on pages 230–235.

Our High-Vis collection is regulated by the international standard ISO EN 20471. The standard dictates the requirements that qualify a garment as highly visible, and also categorises them into three classes of visibility, where Class 3 has the highest visibility, and Class 1 the lowest. As you can imagine, a lot of expertise and experience has gone into developing both these standards, and the high-visibility clothing you need on the job. So always make sure to wear ISO-compliant High-Vis gear from Snickers Workwear.

It's all about staying visible, so you can stay safe.

How does it work?

The difference between fluorescent, reflective and contrast material.

Fluorescent yellow and orange materials increase visibility in dusk, dawn and during the day, as well as in fog or haze.

Contrast materials are colour-fast so that they won't negatively affect the visibility of a garment's fluorescent and reflective properties. They must be certified according to EN ISO 20471:2013.

Reflective material are designed for increased visibility when illuminated in dim and dark conditions.

Orange is the cold yellow

What's the difference between fluorescent orange and fluorescent yellow? Remember, this is all about increasing visibility, and it's usually a lot easier to spot someone wearing a neon yellow garment than an orange one. That's because yellow has a higher luminance, or appears brighter to the naked eye.

However, in a snowy winter landscape the luminance of yellow is outdone by the higher contrast of orange — especially against a background of white. So in bright snowy weather you'll want to dress in orange, and in most other cases yellow will do the trick.

1230 High-Vis Class 3, Softshell Jacket

Softshell work jacket that combines high visibility, amazing fit and hardwearing comfort with advanced functionality. It is windproof and water-repellent and makes a great choice for everyday work all year round.

Windproof and water-repellent high-vis jacket designed for everyday work in areas that require Class 3 visibility. This versatile work jacket is made of a functional softshell fabric and comes with CORDURA®-reinforced elbows for added durability. Dropped sleeve ends offer extra protection without hampering performance while dropped back ensures protection in all working positions and bottom. In addition, bottom hem adjustment provides flexibility while YKK 2-way zipper makes it possible to open the jacket from below for access to tools underneath and for enhanced range of movement when necessary. The jacket also features an inside stow pocket. Plenty of space for profiling.

- High visibility, Class 3 (EN ISO 20471)
- Engineered fit with pre-bent CORDURA®-reinforced elbows for maximum freedom of movement

- Fleece-lined and high wind-protective collar keeps you warm and comfortable
- Heat-sealed reflective tape on sleeves, shoulders and around the body for maximum visibility and safety. (Due to space limitations, size XS do not have reflective tape on the shoulders.)
- Elastic cord adjustment at bottom hem for a stretchy, tight fit at bottom
- YKK 2-way zipper

Fit: Slim

Size: XS-XXXL

Material: Main Fabric: 100% Polyester 265 g/m². Reinforcement: CORDURA® 100% Polyamide 205 g/m².

8038 High-Vis Class 1 Full Zip Hoodie

Stay visible and warm in this high visibility hoodie. The chest pocket is prepared with an ID-badge holder that can be tucked away. Suitable for profiling. EN ISO 20471, class 1.

Versatile high-vis hoodie that provides protection in poorly lit working environments. The hoodie is certified in accordance with EN ISO 20471 Class 2/3 and features heat-transfer reflective tape for enhanced smoothness. In addition, the garment has ribbed sleeve ends and a dropped back hem. Extra comfort and insulation are provided by hand-warming pockets. The hoodie also features a chest pocket with an ID-badge holder.

- ID-badge holder inside the chest pocket
- Heat sealed reflective tape for increased visibility
- Strategically placed dirt areas
- Suitable for profiling

Fit: Regular

Size: XS-XXXL

Material: 100% polyester fleece, 235 g/m².

2534 High-Vis Class 1 T-Shirt

High-visibility t-shirt with cotton on the inside for optimal comfort and elastic reflective on the outside offering Class 1 visibility.

Versatile high-visibility t-shirt made of a double-weave fabric with 100% cotton on the inside and 100% polyester and elastic reflective on the outside. The result is a highly comfortable garment that offers certified visibility in accordance with EN ISO 20471 Class 1. In addition, the t-shirt comes with a lot of dirt areas.

- High visibility, Class 1 (EN ISO 20471)
- Bigger dirt areas at the front than back
- Elastic reflective for optimal freedom of movement
- Snickers logo tab on sleeve

Fit: Regular

Size: XS-XXXL

Material: Main: 50% polyester, 50% cotton, 190 g/m².

2535 High-Vis Class 1 T-Shirt

High-visibility t-shirt that provides durability and safety during work that requires extra visibility. Suitable for profiling and everyday use.

Personal protective t-shirt that offers Class 1 visibility in dim-light working conditions or other hazardous environments, certified according to EN ISO 20471. This versatile t-shirt is made of a soft and functional polyester fabric and is ideal for everyday use. In addition, heat-sealed reflective tape provides extra safety. Plenty of space for profiling.

- High-visibility Class 1 (EN ISO 20471)
- Heat-sealed reflective tape
- Suitable for profiling

Fit: Regular

Size: XS-XXXL

Material: Main fabric: 100% polyester, 150 g/m².

2433 High-Vis Long Sleeve T-Shirt Class 2

Versatile t-shirt created for high visibility during everyday use. The polyester fabric is comfortable to wear and easy to care for. High visibility details provide additional safety in dim conditions.

High-vis long sleeve t-shirt designed with visibility and comfort in mind. The reflective strips ensure that the wearer can be seen in low light conditions to make work safer and more secure. The polyester fabric is comfortable to wear and easily washed to keep the garment in good and clean condition, making it excellent workwear for everyday use. Carefully placed dirt areas ensure the t-shirt looks good after work and also make it easier to care for between uses.

- High visibility design, Class 2 (EN ISO 20471)
- Made from 100% polyester
- Strategically positioned dirt areas
- Printed neck label for added comfort

Fit: Regular

Size: XS-XXXL

Material: Main: 100% polyester, 150 g/m².

4230 High-Vis Class 1, Tool Vest

High-vis tool vest designed for practical tool carrying and storage, featuring mobile pocket, holster pockets and front tool pockets. Plenty of space for profiling.

Versatile high-vis tool vest designed for everyday use. The vest is made of durable fabric and features CORDURA® reinforcements for enhanced longevity. In addition, reflective material provides Class 1 visibility for extra safety in dim light conditions and hazardous environments. An inside expander makes it possible to wear the vest with or without a jacket while an integrated belt reduces pressure on shoulders.

- Mobile pocket
- Integrated belt
- Adjustable shoulders
- Inside expander
- ID badge for added functionality

Fit: Regular

Size: XS-XXXL

Material: Main: 85% polyester, 15% Cotton, 270 g/m². Reinforcement: 100% polyamide CORDURA®, 205 g/m².

4310 High-Vis Class 2, Vest

Bright design at work. Light yet hardwearing high-visibility vest with front zipper and zip pockets. EN ISO 20471, Class 2.

- Reflective bands all around, including over the shoulders so that you're highly visible from all directions – even when bending down
- Zip pockets
- Wide arm openings for maximum freedom of movement and perfect fit over a jacket
- Easy-access plastic-covered ID badge holder on chest
- Zipper at front for maximum convenience

Fit: Regular

Size: S/M, L/XL, XXL/XXXL

Material: 100% durable and comfortable polyester, 130 g/m².

ProtecWork.

ProtecWork is a collection of protective wear that combines expert know-how of heat and flame protection with Snickers Workwears renowned ergonomics and fit. In order to offer the best protective garments, Snickers Workwear has acquired a leading brand on the Swedish market that boasts over 30 years experience designing and developing protective wear for the energy and railway sectors. The result is a cutting-edge collection that offers inherent heat and flame protection, excellent durability, great comfort and an ergonomic, modern fit.

A collection
built on years
of experience
protecting
professionals.

Developed in close partnership with professionals.

Our protective wear is the result of a long and successful partnership with professionals working in the energy and railway sectors. They're the ones working in high-risk environments, and the only ones who truly know how protective wear is used and functions in the real world. This close partnership has resulted in several innovative features, such as symmetrical leg pockets and DuPont™Kevlar® reinforced pockets.

100% inherent protective wear.

Our mission is to provide clothing that protects against burns. All our fabrics are therefore inherent, meaning that the heat and flame protection is built into the fibre. Our main inherent fibre is modacrylic, which combines high flame retardancy with low density. This means that the protective garments can be built with relatively lightweight materials, offering comfort and freedom of movement for the wearer. In addition, modacrylic also provides good protection against electric arc. Ergonomics is also a very important aspect when we develop our protective wear. Garments that provide great fit and optimal mobility tend to be used more often, contributing to increased protection, greater comfort, and enhanced efficiency.

Layer up to increase your protection.

One of the best ways to improve your level of protection is to wear layers (all layers/garments must of course be certified and flame retardant). The main benefit of wearing layers is that the air gap formed between different garments provides increased protection. There is no general rating for how much increased protection the air gap between layers provides, although we have conducted a number of tests that show that the air gap increases protection by approx. 5 cal/cm².

Standards and requirements dictate our design.

Our product development always starts with the items intended use and the task at hand. What are the risks in the work environment? What do the standards require? And what does the wearer need in order to perform optimally? Working based on these facts and requirements, and by conducting thorough tests through-out the entire process, we can develop functional, comfortable and above all safe Personal Protective Equipment.

Outer layer – Jackets

1566 ProtecWork, Jacket

9500

Protective and hard-wearing jacket that protects against heat and flame, antistatic, and electric arc hazards. Durable and supple fabric combine with pre-bent sleeves and stretch panels to ensure great fit, comfort and range of movement. In addition, flame-retardant lining at front, shoulders and sleeves provides enhanced protection for commonly exposed body parts. For sleeves and front the ATPV value is 27,6 cal/cm², class 2 and HAF 89,9%

- Flame-retardant lining at front, shoulders and sleeves as well as dropped back and sleeve ends for enhanced protection.
- Pre-bent sleeves and stretch back panels for great fit and enhanced mobility
- High wind-protective collar keeps you warm and comfortable
- Spacious zip chest pocket with detachable ID badge, large side pockets covered with flaps and pen pocket on the left sleeve
- Zipped Napoleon A4- size pocket for tablet

6695

1361 ProtecWork, Waterproof Shell Jacket, High-Vis Class 3

Waterproof shell jacket providing reliable protection and comfort in hazardous environments and high-risk work areas. The jacket features certified protection against electric arc and merges working comfort with protection.

Waterproof work jacket built to offer high visibility and personal protection in high-risk work areas. The jacket offers certified protection against electric arc, inherent heat and flame protection, and antistatic properties. Waterproof fabric and taped seams ensure protection in wet and windy conditions, while pre-bent sleeves with dropped sleeve ends and a dropped back offer additional comfort and protection. For full weather protection, the jacket should be worn together with trousers 6563.

- Extra high protection against electric arc
- Waterproof jacket according to EN 343
- Certified for welding and allied processes and for protection against lighter chemicals
- Flap-protected side pockets for practical storage
- Chest pocket with ID-card holder inside
- Lined, adjustable and helmet-compatible hood

Size: 44-64, 88-128, 144-164

Material: Main: 55% Modacrylic, 44% Cotton, 1% Antistatic, 275 g/m². Reinforcement: 39% Modacrylic, 28% CORDURA®, 17% Cotton, 15% Aramid, 1% Antistatic, 270 g/m².

6376 ProtecWork, Work Trousers, High-Vis Class 1

Regular fit work trousers for protection and high visibility in hazardous environments. The trousers are designed to offer personal protection and comfort which are strategically complemented with ease of movement and flexibility.

Protective work trousers that are certified to shield against electric arc. The trousers also come equipped with antistatic properties and inherent protection against heat and flames. The heat transfer reflective detail provides visibility that ensures added safety in dim light conditions and high risk environments. Extra knee protection and comfort comes from the KneeGuard® system, knee pockets, and the tactically designed pre-bent legs. Reinforced pockets make for easy storage on the move and they offer durability against sharp tools.

- Certified protection against electric arc
- KneeGuard® system
- Reinforced pockets
- Heat transfer reflective for high visibility
- Pre-bent legs

6060 ProtecWork, Bib & Brace Trousers, High-Vis Class 2

Bib and brace trousers that offer Class 2 visibility and protection against electric arc, heat and flame for safety in high-risk and low-light environments. KneeGuard™ system ensures optimal knee protection.

Bib and brace trousers offering personal protection during welding and work in hazardous environments. They feature a class 1 rating against electric arc and have been designed with inherent heat and flame protection. In addition, Class 2 visibility means they are suitable for work in low-light conditions. Adjustable shoulder straps, pre-bent legs and KneeGuard™ pockets ensure great fit and optimal knee protection. Reinforced pockets make for hard-wearing storage while holster pockets can be bought separately and attached to the trousers or belt.

- Certified protection against electric arc
- Inherent heat and flame protection
- High visibility details
- Antistatic properties
- KneeGuard™ system certified according to EN 14404

8261 ProtecWork, Rain Jacket PU, High-Vis Class 3

Protective PU rain jacket that provides protection against heat, flame, wind and rain. Class 3 visibility offers extra safety in low-light conditions.

High-vis protective PU rain jacket that keeps you dry, visible and protected in wet and low light conditions and hazardous environments. For optimal performance, the jacket comes with extra ventilation at upper back, helmet-compatible hood and openings for easy access to inner-layer pockets. Heat and flame protection with antistatic properties guard against hazards in high-risk areas. In addition, the highest visibility rating, Class 3, provides added security in low-light conditions. Longer fit and helmet-compatible hood enhance protection even more.

- Heat and flame protection
- Wind and water protection
- Button drainage hem to divert water from body
- Helmet-compatible hood
- High visibility Class 3
- Ventilation at upper back

Orange High Visibility

ProtecWork orange assortment will initially be made to order and not available in stock.

/ Welding Class 2

1164 ProtecWork, Insulated Hood Jacket, High-Vis Orange Class 3

Insulated high-vis orange work jacket that enhances safety in high-risk environments. High arc rating and great insulation ensure personal protection in hazardous and cold conditions.

Insulated hood jacket designed for personal protection in high-risk environments. The work jacket has a high arc rating and antistatic properties to protect against heat, flame and electric arc. In addition, the jacket features an insulated construction that offers certified protection against cold according to EN 342 (when worn together with padded trousers). Pre-bent sleeves with dropped ends ensure comfort and mobility while Class 3 high visibility provides enhanced safety in low-light conditions. The jacket also comes with a shorter front to provide easy access to tools and items in the work trouser pockets.

- Inherent heat and flame protection
- High-visibility class 3 in compliance with RIS-3279-TOM
- Electric arc protection
- Certified protection against cold according to EN 342 (worn with padded trousers)
- Wind-protective collar
- Flap-protected side pockets for practical storage

9463 ProtecWork, Boxer

These comfortable boxer briefs are made of a soft fabric that makes a great alternative for those who prefer not to have wool closest to the skin. The boxer briefs material provide basic protection against heat and flame and is the ideal first layer in a high-protection outfit.

When working in high-risk environments it's important to wear flame-retardant garments all the way from the inside, next to skin. These comfortable boxer briefs are made of a soft fabric that makes a great alternative for those who prefer not to have wool closest to the skin. The boxer briefs provide basic protection against heat and flame and is the ideal first layer in a high-protection outfit. Short-sleeve or short leg items cannot be certified for electric arc; for work in such environments, we recommend the long-leg 9460 version.

- Soft and comfortable fabric
- Great stretch for a tight, perfect fit
- Protects against heat and flame, antistatic
- Combine with ProtecWork mid- and outer-layer garments to build protection in layers
- Antistatic properties

EN ISO 14116:2015 Index 3

EN 1149-5:2018

Fit: Regular

Size: XS-XXXL

Material: 57% modacrylic FR, 36% cotton, 5% elastan, 2% antistatic, 210 g/m².

9464 ProtecWork, Wool Boxer

Boxer shorts made of soft wool and flame-retardant viscose that offer both protection and great comfort. Wool provides natural moisture transport and great insulation, keeping you warm and dry in cold conditions. Short-sleeve or short-leg items cannot be certified for electric arc; for work in such environments we recommend the long-leg 9468 version in same material or combine with long-leg models. However, this material can withstand calories of up to ATPV 6,4 cal/cm².

- Wool for optimal insulation
- Great stretch for a tight, perfect fit
- Protects against heat and flame, antistatic and electric arc
- Combine with ProtecWork mid- and outer-layer garments to build protection in layers

EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Regular

Size: XS-XXXL

Material: 49% viscose FR, 49% wool, 2% antistatic, 210 g/m².

Women's fit

9465 ProtecWork, Sport Bra

Great protection starts from the inside, next to skin. This functional sports bra is made of a smooth, itch-free fabric for optimal comfort. In addition, the sports bra provides basic protection against heat and flame, antistatic as well as electric arc and is the ideal first layer in a high-protection outfit. Short-sleeve items cannot be certified for electric arc; for work in such environments we recommend to combine with the long-sleeve versions.

- Soft and comfortable fabric
- Great stretch for a tight, perfect fit
- Protects against heat and flame, antistatic
- Antistatic properties

EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Regular

Size: XS-XXXL

Material: 57% modacrylic FR, 36% cotton, 5% elasthan, 2% antistatic, 210 g/m².

Women's fit

9466 ProtecWork, Women's Panty

When working in high-risk environments it's important to wear flame-retardant garments all the way from the inside, next to skin. These comfortable panties are made of soft fabric that makes a great alternative for those who prefer not to have wool closest to the skin. In addition, the panties provide basic protection against heat and flame and is the ideal first layer in a high-protection outfit.

- Soft and comfortable fabric
- Great stretch for a tight, perfect fit
- Protects against heat and flame
- Combine with ProtecWork mid- and outer-layer garments to build protection in layers
- Antistatic properties

EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Regular

Size: S-XXXL

Material: 57% modacrylic FR, 36% cotton, 5% elasthan, 2% antistatic, 210 g/m².

9468 ProtecWork, Wool Bottoms

Soft wool and flame-retardant viscose base layer bottoms that provide reliable protection in hazardous and high-risk environments. The bottoms merge personal protection with working comfort for safety and efficient performance.

Versatile base layer bottoms that offer reliable protection during work in hazardous environments or other high-risk areas. The bottoms are made of insulating wool and flame-retardant viscose fabric that provides working comfort, warmth and ventilation during work in cold conditions. The personal protective bottoms feature antistatic properties, inherent heat and flame protection and protection against electric arc. Combine with tops in the same great material.

- Warm and comfortable wool fabric
- Certified protection against electric arc

- Inherent heat and flame protection
- Antistatic properties

EN ISO 11612:2015 A1, A2, B1, C1

IEC 61482-2:2018 ELIM 4,6 cal/cm², ATPV 6,4 cal/cm², APC 1 (4kA)

EN 1149-5:2018

Fit: Slim

Size: XS-XXXL

Material: 49% viscose FR, 49% wool, 2% antistatic, 210 g/m².

Accessories

9062 ProtecWork Wool Balaclava

Protective balaclava made of flame-retardant wool and modacrylic fabric that offers certified protection against electric arc, heat and flame. This soft item protects the head, throat and neck, which are commonly exposed body parts in high-risk environments. Furthermore, the balaclava allows you to quickly adjust to changing temperature and weather conditions.

- Flame-retardant certified fabric
- Soft and comfortable
- Protects commonly exposed areas

EN ISO 14116:2015 Index 3

EN 1149-5:2018

Fit: Regular

Size: One size

Material: 68% wool, 30% modacrylic, 2% antistatic, 450 g/m².

9500

9065 ProtecWork, Helmet Hood

Warm, fleece-lined hood designed to be worn underneath a helmet for extra insulation and comfort in really cold conditions. Velcro on sides and back for easy attachment to the inside of the helmet. Made of flame-retardant fabric.

- Shaped to fit underneath a helmet
- Fleece lining for warmth and comfort
- Velcro for attachment to helmet
- Made of flame-retardant and electric-arc-certified fabric

EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Slim

Size: XS-XXL

Material: Main: 49% Modacrylic FR, 42% Cotton, 5% Aramid, 3% Polyamide, 1% Antistatic, 300 g/m². Lining: 55% Modacrylic, 30% Cotton, 18% Polyester, 2% Antistatic, 370 g/m².

6600

9066 ProtecWork, Shell Cap

Stay warm and protected in harsh conditions with this comfortable shell cap, made from waterproof fabric and lined with soft fleece. The adjustable brim, reinforced with a wire, can be shaped to provide personalized protection from the elements.

- Waterproof, thin and supple fabric
- Fleece lining
- Smooth, no-chafing edges
- Adjustable brim with wire reinforcement for personalized protection.
- Made of flame-retardant and electric-arc-certified fabric

EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Regular

Size: XS-XXL

Material: Main: 55% Protal, 44% Cotton, 1% Antistatic, PU laminated, 265 g/m². Lining: 55% Modacrylic, 30% Cotton, 18% Polyester, 2% Antistatic, 370 g/m².

6600

9068 ProtecWork, Beanie

Comfortable and stylish beanie made of flame-retardant and electric-arc-certified fabric. Great accessory for quick and easy adjustment to rapid weather changes. Accessory items cannot be certified for electric arc, however this material can withstand calories of up to 6,8 cal/cm².

- Made of flame-retardant and electric-arc-certified fabric
- Soft and comfortable
- Highly visible for increased visibility

EN ISO 14116:2015 Index 3
EN ISO 1149-5:2008

Fit: Slim

Size: S/M, L/XL

Material: Main: 57% modacrylic, 36% cotton, 5% elastan, 2% antistatic, 210 g/m². Lining: 58% modacrylic FR, 35% cotton, 2% antistatic, 5% elastan.

0400

9069 ProtecWork, Headwear

Multifunctional headwear that can be used in many different ways. Use it as a hat, pull it up over your face and ears or protect your throat and neck, which are exposed body areas in accidents. In addition, it's a great accessory for a quick and easy adjustment to rapid weather changes. Accessory items cannot be certified for electric arc. However this material can withstand calories of up to 3,4 cal/cm².

- Made of flame-retardant and electric-arc-certified fabric
- Soft and comfortable
- Multifunctional headwear

EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Regular

Size: One size

Material: 57% Modacrylic, 36% Cotton, 5% Elastan, 2% antistatic, 210 g/m².

0400

9075 ProtecWork, Wool Beanie

Thick, insulating beanie that combines the natural functional properties of wool to keep you warm and dry in truly cold conditions. Longer style that can either be worn cuffed (folded) for a classic look or uncuffed for a more casual expression. Accessory items cannot be certified for electric arc; for work in such environments, we recommend to combine the long-sleeve versions. However this material can withstand calories up to 13,2 cal/cm².

- Wool for optimal insulation
- Great stretch for a tight, perfect fit
- Protects against heat and flame, antistatic and electric arc

EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Slim

Size: S/M, L/XL

Material: 68% wool, 30% modacrylic FR, 2% antistatic, 450 g/m².

0400

9076 ProtecWork, Wool Headwear

As neck, face and head are particularly exposed parts of the body in the case of an accident, make sure to wear this multifunctional headwear. It can be used in many different ways, as a hat, pull it up over your face and ears or protect your throat and neck. In addition, it's a great accessory for a quick and easy adjustment to rapid weather changes. Made of soft wool and flame-retardant viscose that offer both protection and great comfort.

- Made of flame-retardant and electric arc-certified fabric
- Soft and comfortable
- Multifunctional headwear

EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Regular

Size: One size

Material: 49% wool, 49% viscose, 2% antistatic, 210 g/m².

0404

9116 ProtecWork, Kneepads FR

For full protection against heat and flame, wear these flame-retardant kneepads together with our trousers. The advanced kneepads feature vertical and horizontal cut lines for optimal flexibility and fit during intense work.

Advanced kneepads offering certified flame resistance and knee protection for safe work in high-risk environments. The kneepads are certified according to EN ISO 14116 and come with an EN 14404 Type 2 Level 1 rating to guard against pebbles, nails and various floor debris. In addition, the multilayered kneepads are made of a soft and comfortable rubber material laminated with CORDURA® for extra durability. The pads also feature vertical and horizontal cut lines to ensure a flexible fit that adapts to the moving body. Compatible with the KneeGuard™ system.

- Soft and comfortable material
- Laminated with CORDURA® for extra durability
- Horizontal and vertical cut lines for a flexible fit
- Compatible with the KneeGuard™ system

EN ISO 14116:2015 Index 3
EN 14404 Type 2, Level 1 knee protection

Size: One size

Material: Main: 100% EPDM rubber.
Reinforcement: 100% CORDURA®

See page 50-53 for knee pads 9110, 9112, 9191.

0400

9160 ProtecWork, Flame-Retardant Elastic Braces

Elastic braces with inherent protection against heat and flame, featuring wide elastic straps for optimal support and all-day comfort.

Wide braces made of inherent flame-retardant elastic that offer certified protection against heat and flame. The braces feature 50 mm wide straps to evenly distribute your load and ensure all-day working comfort. In addition, ergonomic design ensures optimal fit around the shoulders.

- Inherent protection against heat and flame.
- 50 mm wide elastic straps for optimal comfort and support.

- Ergonomic design.
- Quick and easy length adjustment.
- Wide and firm clips for secure fastening.
- Flame-retardant red thread for optimal safety.

EN ISO 14116:2015 Index 3

Size: one-size

Material: 42% modacrylic, 28% cotton, 30% Elastane.

0416

9161 ProtecWork, Flame-Retardant Belt

Thin and elastic waist belt with easy-adjustable buckle for optimum fit and comfort

- 40 mm wide, elastic belt that shapes itself to your body
- Made of flame-retardant and electric-arc-certified fabric
- Hard-wearing, non-scratch composite buckle with quick and easy lock system
- Inherent flame protection.

EN ISO 14116:2015 Index 3

Fit: Regular

Size: Size: 90,110,130 cm

Material: 70% polyester, 30% spandex.

9360 ProtecWork, Glove

0904

Ergonomic and supple glove that protects the most exposed body part against flame and electric arc. The glove is made of smooth, supple goatskin and comes with pre-shaped design for optimal dexterity. EN 388.

- Supple and comfortable goatskin
- Arc rating ATPV=13,0 Cal/m² and APC1 (4 kA) when tested in accordance with IEC 61482-2:2018
- Seams sewn with flame-retardant Aramid thread
- Pre-shaped design for optimal dexterity

Gloves meet the following electric arc ratings when tested in accordance with IEC 61482-2:2018 ATPV 13 cal/cm² APC 1 (4 kA) HAF: 84%

EN 388:2003 level 2122

EN 407:2004 level 4122XX

Size: 6-12

Material: Palm: 100% Goatskin 350 g/m². Backing: 60% Modacrylic, 40% Cotton, 310 g/m².

6695

9787 ProtecWork, Multi Function Holster Pockets

Looking for a quick and easy upgrade of your workwear? These durable holster pockets feature several pockets and tool loops that will help you work more efficiently. Designed to be worn as an accessory in belt. NOTE! We do not recommend using these holster pockets on trousers certified according to EN ISO 11611 and/or EN ISO 11612 DE and/or EN 13034, which require that pockets should be closed.

- Based on the 6-series trouser holster pockets, but with a more advanced design
- Many electrician webbing tool loops both outside and inside the pockets

- Extra tough DuPont™Kevlar® fiber reinforcement inside tool pocket for enhanced durability
- Zipped compartment on the left pocket

Size: One-size

Material: Main: 49% modacrylic FR, 42% cotton, 5% aramid, 3% polyamide, 1% antistatic, 300 g/m². Reinforcement: 54% polyester 24% aramide, 13% polyamide, 9% polyurethane, 450 g/m².

6695

9797 ProtecWork, Holster Pockets

Upgrade your work trousers with these stripped-down holster pockets, featuring two large pockets. Designed to be worn as an accessory with a belt. NOTE! We do not recommend using these holster pockets on trousers certified according to EN ISO 11611 and/or EN ISO 11612 DE and/or EN 13034, which require that pockets should be closed.

- Two large pockets
- Based on the 3-series trouser holster pockets

Size: One-size

Material: 49% modacrylic FR, 42% cotton, 5% aramid, 3% polyamide, 1% antistatic, 300 g/m².

9500

6600

4260 ProtecWork, Vest, High-Vis Class 1

Hard-wearing, protective tool vest with easy-to-access pockets for instant access to all your tools. Features flame-retardant fabric, DuPont™ Kevlar® fiber reinforcements and heat-sealed reflective tape at front, back and shoulders for enhanced visibility.

- Wide shoulder straps, elastic in the back, and adjustable ergonomic belt
- DuPont™ Kevlar® fiber reinforced holster pockets at front with tool loops and angled rear holster pockets
- Kevlar® reinforced chest pockets featuring covered knife fastener, mobile phone compartment and detachable ID badge
- Integrated expander means the tool vest can be easily expanded and worn over a jacket
- Heat-sealed reflective tape around body

EN ISO 20471:2013+A1:2016 Class 1
EN ISO 14116:2015 Index 3
EN 1149-5:2018

Fit: Regular
Size: XS-4XL

Material: 49% Modacrylic FR, 42% Cotton, 5% Aramid, 3% Polyamide, 1% Antistatic, 300 g/m².

6600

4361 ProtecWork, Vest, High-Vis Class 3/2

Highly visible, flame-retardant vest that allows you to quickly and easily enhance your protection in a crucial body area as well as improve your visibility at roadworks or in low-light conditions. The vest features short sleeves in order to be certified according to Class 3. Size S Class 2.

- Heat transfer reflective tape for high visibility
- Flame-retardant fabric
- Short sleeves for Class 3 certification

EN ISO 20471:2013+A1:2016 Class 3*
EN ISO 14116:2015 Index 1

Fit: Regular
Size: S-XXL

Material: 100% Polyester FR

*Size S is sleeveless and Class 2

6655

0400

9261 ProtecWork, Wool Terry Socks

Soft, terry-knit wool socks with loose fit for optimal comfort. Made of wool, which provides natural moisture transport and great insulation, these socks keep your feet warm and dry in cold conditions. Furthermore, the terry-knitting technique offers soft shock-absorption for a smooth stride.

- Wool provides great insulation
- Terry offers shock absorption
- Loose fit
- Made of flame-retardant yarns

EN ISO 14116:2015 Index 3

Size: 37/39, 40/42, 43/45, 46/48

Material: 37% Wool, 37% Viscose FR, 20% Polyamide, 6% Lycra

0400

9262 ProtecWork, Light Wool Socks

Durable work socks that feature an ergonomic design for a perfect fit. The socks also come with ribs at gusset and around the arch to stay in place, as well as thin toe seams to minimize chafing. Antistatic properties.

- Ergonomic, foot-shaped design for optimal fit
- Ribs at gusset and around the arch keep the socks in place
- Thin toe seams to avoid chafing
- Antistatic properties as well as heat and flame protection

EN ISO 14116:2015 Index 1
EN 1149-5:2018

Size: 37/39, 40/42, 43/45, 46/48

Material: 52% wool, 34% viscose FR, 11% polyamide, 2% antistatic, 1% elastane.

0400

9264 ProtecWork, Heavy Wool Socks

When it's really cold, wool is the only answer. These thick socks combine the natural functional properties of wool to keep your feet warm and dry in truly cold conditions. In addition, the socks come with ribs at gusset and around the arch to stay in place. Thin toe seams minimize chafing, while ergonomic design ensures a perfect fit.

- Heavy wool for optimal warmth
- Ergonomic, foot-shaped design for optimal fit
- Ribs at gusset and around the arch keep the socks in place
- Thin toe seams to avoid chafing
- Heat and flame protection

EN ISO 14116:2015 Index 3

Size: 37/39, 40/42, 43/45, 46/48

Material: 44% wool, 44% viscose FR, 11% polyamide, 1% elastane.

Personal protective equipment.

Personal Protective Equipment (PPE) Regulation (EU) 2016/425.

The overall purpose of the Personal Protective Equipment (PPE) Regulation is to define rules for equipment designed and manufactured to be worn or held by a person for protection against one or more risks to that person's health or safety.

Further information is available from the European Commission at ec.europa.eu

Garments marked with a user instruction symbol have a guide which contains important information for the user to take into consideration when choosing PPE. How to understand the

markings in the garment, how to use the PPE and how to take care of the garment in order to retain the protection offered.

EN ISO 20471 High visibility clothing.

EN ISO 20471 specifies requirements for clothing capable of signaling the user's presence visually. Performance requirements are included for color and retro reflection as well as for minimum areas and for the disposition of fluorescent and reflective materials.

The norm includes three different classes where class 3 has the highest visibility. For each class, the norm dictates the area and placement of the fluorescent, reflective and contrast

materials, respectively. None of the fluorescent and reflective materials can replace the other in calculating areas as the purpose differs.

Garments can be combined to achieve a higher level of visibility and class. However, it's not always that 1+2 equals 3. It all depends on the size of the area of the material in question (fluorescent and reflective), as well as design requirements.

EN ISO 11612 Protective clothing against heat and flame.

EN ISO 11612 specifies performance for clothing designed to protect from heat and/or flame (not including protection for firefighters and welders). The norm indicates protection against ignition from various heat sources: (A) limited flame spread, A1 surface ignition and A2 edge ignition, according to test method ISO15025; (B) convective heat and open flames, according to test method ISO9151; (C) radiant heat, according to test method ISO6942; (D) molten aluminum splash, according to test method ISO9185; (E) molten iron splash, according to test method ISO9185; and (F) contact heat (flat iron, hot plate etc.), according to test method ISO12127-1.

Garments certified according to EN ISO 11612 should be used together with other protective clothing that meets

the requirements of EN ISO 11612. Furthermore, the norm requires full protection of arms and legs, which means t-shirts and shorts do not meet the EN ISO 11612 requirements. However, the user can wear clothes certified according to EN 14116 (which does not have the same design requirements) underneath for enhanced protection.

To ensure full protection, the head, neck, hands and feet must be covered with other approved protective clothing. Note that garments classified as underwear should always be worn together with outer garments that meet the protection requirements of EN ISO 11612. The underwear will not provide the right level of protection on their own.

EN ISO 14116 Protective clothing against flame.

EN ISO 14116 specifies the performance of protective clothing for workers exposed to occasional brief contact with open flames with no other thermal risks. This norm is a “lighter” version of EN ISO 11612 and is relevant for garments without full-length sleeves and legs as well as accessories such as hats, beanies, balaclavas, socks, underpants etc.

EN ISO 14116 is available in three different indexes – 1, 2 and 3, where Index 3 stipulates the highest protection requirements. Materials classified as Index 1 must not be worn next to skin and garments that contain Index 1 materials should only be worn on top of Index 2 or 3 garments.

IEC 61482-2 / EN 61482-2 Clothing for protection from the thermal hazards of an electric arc.

Despite all the measures in place a large number of electric arc accidents occur every year. IEC 61482-2 specifies requirements for clothing protecting against the thermal hazards of an electric arc. These clothes belong to the Risk III category, which defines garments used in high-risk environments, and which are certified to eliminate second-degree burns in the event of an electric arc flash (flashover).

In order to measure the product's level of protection, the garment is subjected to two different test methods: an open arc test and a box test. The test methods use different test set-ups, arc configurations, test parameters, test procedures and result parameters. The results from the different methods of testing can be neither physically compared nor mathematically converted to those from the other form of testing. The arc rating has to be tested and assessed by either one or the other method. In a box test, the object is subjected to a directed arc flash of either 4kA (APC -Arc protection class - 1) or 7kA (APC 2).

ATPV or E_{BT50}

With the open arc method, the test result is given in calories – cal/cm². The calorie value gives you an indication of how much heat/energy exposure you could withstand before you risk a 50% chance of getting a second degree burn. As well as a result in calories, an ATPV (Arc Thermal Performance Value) or E_{BT50} (Energy Break-open Threshold), when holes begin

to form in the fabric) value is also specified. Neither value is better than the other. Basically, garments/fabrics that get an E_{BT50} value are typically more insulating than they are strong and ATPV garments/fabrics are usually stronger than they are insulating.

ELIM – eliminate the risk of a second-degree burn

Whereas the ATPV or EBT50 value gives an indication of what energy level you run a 50% risk of getting a second-degree burn at, the incident energy limit (ELIM) defines the energy level at which you avoid the risk of a second-degree burn. Remember, however, that there is still a risk of getting a first-degree burn injury. The ELIM value is calculated from the average of the three highest incident energy data points without breakopen, shrink-open and which do not exceed the Stoll curve. The three incident energy data points are taken just below the mix zone in the test report. The Stoll curve determines the rating of the transfer of heat energy (calories) based on the time of transfer and the level of heat energy produced.

NOTE! All garments worn must protect against electric arc! Including underwear, socks, gloves, underpants and t-shirts or shirts worn underneath the outer layer. And remember that the more layers of electric-arc-protective clothing you wear, the higher your protection.

EN 13034 Protective clothing against liquid chemicals.

Specifying the requirements for clothing offering limited protection against liquid chemicals, EN 13034 targets professions and situations in which the wearer relatively easily can step out from the risk environment and quickly remove the garment. Typical professions include truck drivers who drive gasoline transports and service technicians who occasionally handles lubricants, acids etc. For tougher environments with higher risks, higher protection garments are required.

The classification Type 6 refers to full chemical overalls whereas Type PB refers to partial body protection, for example jackets and trousers.

The norm's design requirements state that the garment should include no features that may collect liquid chemicals and hold them onto the fabric surface (such as unprotected pockets etc).

NOTE! Since liquid chemicals often are flammable, the user should wear antistatic clothing for optimal protection as well as flame retardent clothing. EN 13034, EN ISO 11612 and EN 1149 make a great combination for this purpose.

EN ISO 11611 Protective clothing for use in welding and allied processes.

EN ISO 11611 specifies material performance and design requirements for clothing developed to protect against heat and flame and welding. Essentially the welding version of EN ISO 11612, this norm defines protection against ignition from various heat sources, such as open flames, molten iron splash and contact heat. In addition, garments certified according to EN ISO 11611 protect against radiant heat from the arc as well as minimize the possibility of electrical shock by short-term, accidental contact with live electrical conductors.

EN ISO 11611 features two classes, Class 1 and Class 2, depending on the type of welding technique used. Class 1

comprises less hazardous welding techniques and situations, lower levels of spatter (splashes of molten metal) and radiant heat, whereas Class 2 includes more hazardous welding techniques and situations, higher levels of spatter and radiant heat.

The norm also includes several design requirements, such as that suits should completely cover the upper and lower torso, neck, arms and legs, and that external pockets should be covered by flaps at least 20 mm wider than the opening of the pocket.

EN 342 Protective clothing against cold.

EN 342 specifies the requirements and performance of clothing designed to protect against cooling of the body in cold environments. It is possible to certify single garments as well as an entire outfit in several layers.

Wearing several layers is a great way of increasing insulation and enhance the protection against cold. The layered outfit also makes it easy to adjust to rapid temperature changes.

Remember that sweating should be avoided during continuous cold exposure, since moisture absorption will progressively reduce insulation. In addition, wind increases the need for protection. In the User's Guide that comes with each garment you can see correlation between temperature, wind speed and level of activity for the wearer to see under what conditions you can work.

There will be items in our range that remain certified under the old standard EN 14404:2010, while several new styles will be launched and certified according to the new standard EN 14404-3:2024. For products certified according to 14404:2010, the certification is valid as long as our certificates remain valid.

EN 14404:2010 Knee protection.

This standard encompasses the size, force distribution, penetration resistance and usage of kneepads.

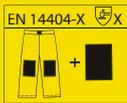

Type 2 – integrated knee protection

Work in a kneeling position involves the risk of chronic conditions such as prepatellar bursitis and cartilage injuries caused by continuous pressure on the knees. Knee protection is therefore recommended for all work in a kneeling position. The protection should distribute forces evenly and prevent hard objects on the ground from causing injuries. It is important that knee protectors do not compromise venous drainage in the leg while kneeling or standing up. It must therefore be easy for workers to change position and to stand up to re-establish a normal blood circulation at frequent intervals while wearing knee protectors. We use Type 2 knee

protectors in our products. For this type, the knee protection is integrated with the trousers, which means that wherever you go your knees are always protected. For Type 2 setups, the knee protectors and the trousers are co-certified, ensuring safe and secure protection.

Various levels of protection

Knee protection is also classified in three performance levels. Level 0 includes knee protectors suitable only for use on flat surfaces and providing no protection against penetration. Level 1 and 2 items, however, are suitable for use on both flat and non-flat surfaces in harsher conditions and provide protection against penetration at forces of various degrees.

EN 14404-3:2024 Knee protection.

This standard encompasses the size, force distribution, penetration resistance and usage of kneepads.

Type 3 – integrated knee protection

Work in a kneeling position involves the risk of chronic conditions such as prepatellar bursitis and cartilage injuries caused by continuous pressure on the knees. Knee protection is therefore recommended for all work in a kneeling position. The protection should distribute forces evenly and prevent hard objects on the ground from causing injuries. It is important that knee protectors do not compromise venous drainage in the leg while kneeling or standing up. It must therefore be easy for workers to change position and to stand up to re-establish a normal blood circulation at frequent intervals while wearing knee protectors. We use Type 3 knee protectors in our products. For this type, the knee protection

is integrated with the trousers, which means that wherever you go your knees are always protected. For Type 3 setups, the knee protectors and the trousers are co-certified, ensuring safe and secure protection.

Various levels of protection

Knee protection is also classified into four performance levels. Level 0 includes knee protectors that provide no penetration protection and are only suitable for flat, even surfaces. Level 1 is designed to offer basic penetration protection on flat surfaces, while Level 1U provides the same level of protection but is specifically tested and approved for uneven surfaces. Level 2 offers the highest standard, delivering superior protection and force distribution, particularly on uneven surfaces.

EN 1149-5 Protective clothing electrostatic properties.

EN 1149-5 specifies material performance and design requirements for protective clothing with electrostatic properties. These protective clothes are designed to avoid the risk of incendiary discharge (the formation of sparks), when for example an elbow or a knee is brushed against a wall or similar surface/object. This is vital when working with flammable materials such as gas or gasoline.

The material performance is based on the material's surface resistivity, electrical resistance and/or charge decay. In

order to be fully protected, all non-complying materials and conductive parts (zippers etc) should be fully covered. In addition, the person must be properly earthed by wearing shoes that allow static electricity to dissipate into the ground.

NOTE! EN1149-5 certification is not sufficient for work with fine electronics and similar sensitive electronics (microchips, printed circuit boards, cell phone assembly, etc). For this kind of work, you need protective clothing certified according to EN 61340.

EN 343 Protective clothing against rain.

Rain doesn't only make you wet, but also cold, hampering your work performance.

EN 343 specifies the performance and requirements of clothing protecting against rain and vapor. The norm defines the water penetration resistance of the garment's fabric and seams and water vapor resistance. Both feature four classifications – 1, 2, 3 and 4 – where classification 4 indicates the best performance. Ready-made garment rain tower test (R) is optional and will be replaced with X if garment has not been tested.

Remember that although a certified product protects against rain, the wearer can still be wet and cold from the inside through heavy sweating and lack of efficient ventilation (breathability) in the garment. To minimize the accumulation of moisture vapor (sweat) from the body, the user should choose garments based on the work intensity. The higher intensity, the higher breathability is needed, and vice versa.

EN 388 Protective gloves against mechanical risks.

This standard applies to all kinds of protective gloves in respect of physical and mechanical aggressions caused by abrasion, blade cut, tear, puncture and, if applicable, impact.

A performance level is determined according to each test result – the higher the number or ascending letter, the greater the level of protection. Results are displayed using a pictogram, permitting clear understanding of the capability of the glove.

a. Resistance to abrasion: based on the number of cycles required to abrade through the sample glove. The resistance to abrasion is measured by the number of cycles required for hole to occur. Highest protection is 4 and is equal with 8000 cycles.

b. Circular blade cut resistance: based on the number of cycles required to cut through the sample by a circular rotating blade at a constant speed. The result is compared with a reference material and an index is obtained. Highest protection is 5 and is equal with an index of 20.

c. Tear resistance: based on the amount of force required to tear the sample. The resistance to tear is defined as the force necessary to propagate a tear in a rectangular specimen slit half way along its length. The specimen shall be torn totally apart. Highest protection is 4 and is equal with 75 Newton.

d. Puncture resistance: based on the amount of force required to pierce the sample with a standard sized point and speed (10 cm/min). Highest protection is 4 and is equal with 150 Newton.

In all cases, 0 indicates the lowest level of performance, as follows. These are the requirements for each performance levels. The performance level is displayed alongside the pictogram.

e. Straight blade cut resistance: based on a straight blade drawn across the sample until cut-through takes place and measures the contact load applied to the blade to make a cut-through over a 20 mm stroke length. The performance levels range from 'level A' cut resistance with a contact force between 2N and 5N, up to 'level F', with a contact force greater than 30N.

f. Impact resistance: This is an optional test and is used for gloves which incorporate specific impact-resistant properties which may be added to the palm, back of the hand or the knuckles. Testing is carried out in accordance with clause 6.9 of EN 13594:2015 – 'Protective gloves for motorcycle riders'. A marking code 'P' is added for gloves meeting the impact-resistant requirements.

Performance level	0	1	2	3	4	5
a. Abrasion resistance (cycles)	<100	100	500	2000	8000	–
b. Blade cut resistance (factor)	<1.2	1.2	2.5	5.0	10.0	20.0
c. Tear resistance (newton)	<10	10	25	50	75	–
d. Puncture resistance (newton)	<20	20	60	100	150	–
Level	A	B	C	D	E	F
e. Straight blade cut resistance (N)	2	5	10	15	22	30
f. Impact resistance	Approved (P)			Not approved (blank)		

EN 407 Protective gloves against thermal risks.

This standard specifies thermal performance for protective gloves against heat and/or fire. Snickers Workwear has gloves with resistance to flammability.

- a. Resistance to flammability**
(performance level 0 – 4)
- b. Contact heat resistance**
(performance level 0 – 4)
- c. Convective heat resistance**
(performance level 0 – 4)
- d. Radiant heat resistance**
(performance level 0 – 4)
- e. Resistance to small splashes of molten metal**
(performance level 0 – 4)
- f. Resistance to large splashes of molten metal**
(performance level 0 – 4)

Gloves must achieve at least Performance level 1 for abrasion and tear strength.

X=performance level not tested.

Resistance to flammability: based on the length of time the material continues to burn and glow after the source of ignition is removed. The seams of the glove shall not come apart after an ignition time of 15 seconds.

Contact heat resistance: based on the temperature range (100–500 °C) at which the user will feel no pain for at least 15 seconds. If an EN level 3 or higher is obtained, the product shall record at least EN level 3 in the flammability test. Otherwise, the maximum Contact heat level shall be reported as level 2.

Convective heat resistance: based on the length of time the glove is able to delay the transfer of heat from a flame. A level of performance shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

Radiant heat resistance: based on the length of time the glove is able to delay the transfer of heat when exposed to a radiant heat source. A performance level shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

Resistance to small splashes of molten metal: the number of molten metal drops required to heat the glove sample to a given level. A performance level shall only be mentioned if a performance level 3 or 4 is obtained in the flammability test.

Resistance to large splashes of molten metal: the weight of molten metal required to cause smoothing or pinholing across a simulated skin placed directly behind the glove sample. The test is failed if metal droplets remain stuck to the glove material or if the specimen ignites.

EN 511 Protective gloves against cold.

This standard applies to any gloves to protect the hands against convective and contact cold down to –50 °C. Protection against cold is expressed by a pictogram followed by a series of 3 performance levels, relating to specific protective qualities. Highest protection is 4.

- a. Resistance to convective cold:** Performance level 0–4. Based on the thermal insulation properties of the glove which are obtained by measuring the transfer of cold via convection.
- b. Resistance to contact cold:** Performance level 0–4. Based on the thermal resistance of the glove material when exposed to contact with a cold object.

c. Permeability by water:
0 or 1. 0 = water penetration after 30 minutes of exposure.
1 = no water penetration.

X=performance level not tested.

All gloves must also achieve at least performance level 1 for abrasion and tear according to EN 388.

Sharpen your profile.

Doing a professional job is the best way to spread the word about your company. Combined with professional profiling you will double the impact. At Snickers Workwear we are happy to assist you with everything from heatsealing and customised embroidery to personalised packaging. All it takes to help you show your skills.

T-shirt profiling.

Heat-sealing is the best choice when profiling your company T-shirts. Count on high quality in any size and colour.

Quality embroidery.

With embroidery you get quality with every stitch, but remember that words or symbols smaller than 5 mm can be difficult to read.

Foul weather garments.

When profiling your waterproof garments, heat sealing is the way to go. If you prefer embroidery, we will tape the rear of the embroidery to make sure the garment retains its waterproof characteristics.

Fleece profiling.

For a company-profiled fleece, embroidery is the obvious choice since heat-sealing might leave marks in the fabric.

Reflective stripes.

We can sew additional reflective stripes onto your work trousers and jackets. A cost-efficient solution to boost your personal protection.

High-Vis profiling.

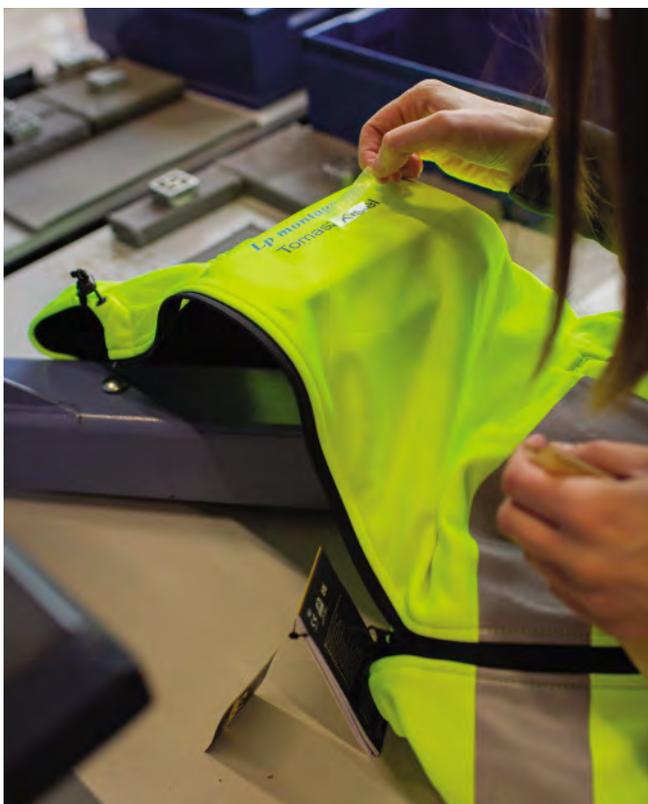

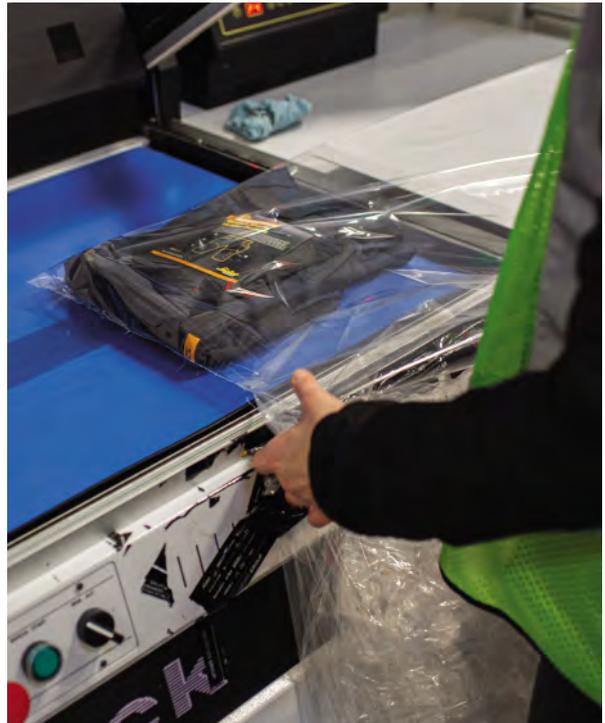

Profiling High-Vis garments is rather special. Excessively large logos may jeopardise the classification of the garment. For optimum and safe company profiling, please contact us for more information.

At Snickers Workwear we only use high-quality threads to make sure your company logo stands out in the long run.

Our embroidery embodies quality with every stitch. Giving your workwear an image boost that stands out in all the right ways — for a long time to come.

With our advanced heat-sealing technique you get distinctive high-quality prints in the sizes and colours of your choice.

When you order a range of garments for all employees we have the perfect service for you: Personalised packaging. That means everyone gets all his or hers garments in a package labelled with their name. This facilitates easier internal distribution at your company and guarantees that everybody gets the right garments and the right sizes. Easy, convenient and personal.

Matching design, colours and technical features.

The design philosophy at Snickers Workwear allows you and your team to choose a workwear appearance that reflects your business. By choosing the same styles, colors, or technical features, you ensure a uniform that is not only safe and comfortable but also stylish and professional. In addition, most of our styles also leave plenty of room for profiling.

1. Design – consistent silhouette.

Choose workwear with matching designs for a unified look. For instance, our 1100 jacket forms a base for various jackets, pairing perfectly with our AllroundWork trousers for a cohesive appearance.

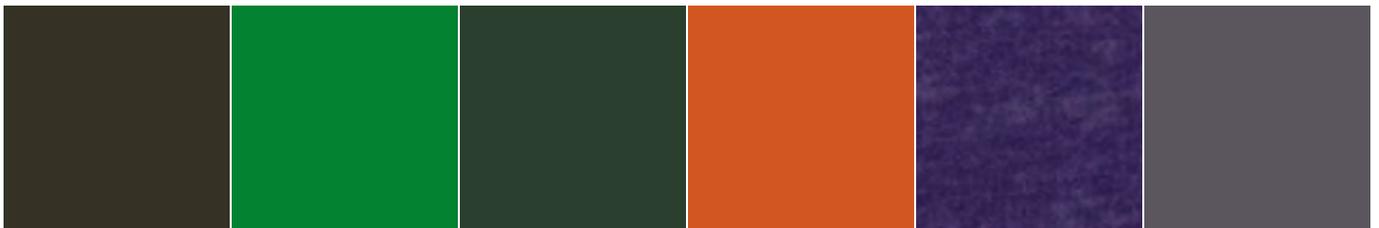

2. Features – choose a series.

Selecting items from the same feature set ensures a unified visual identity. Our collections: AllroundWork, FlexiWork, LiteWork, RuffWork, High-Vis and ProtecWork make it simple to create a consistent look.

3. Colours – align with your brand.

With a wide range of colours available, you can easily select workwear that complements your brand's colour palette for a striking, uniform style.

35 Dark Khaki Green

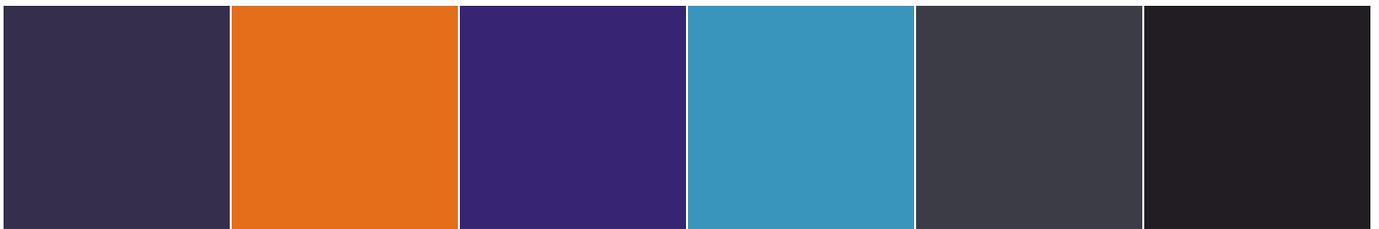

37 Apple Green

39 Forest Green

41 Warm Orange

45 Dark Navy Melange

48 Stone Grey

53 Deep Blue

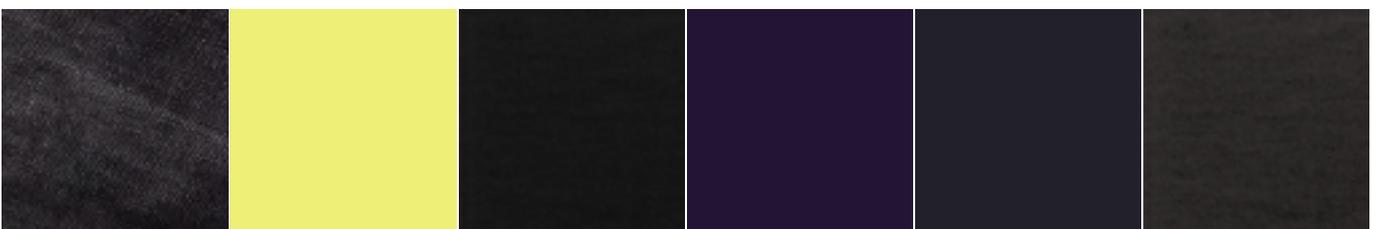

55 High-Vis Orange

56 True Blue

57 Aqua Blue

58 Steel Grey

59 Dark Steel Grey

65 Denim

66 High-Vis Yellow/
67 Neon Yellow

74 Muted Black

95 Navy

96 Dark Navy

98 Anthracite Melange

Symbols.

These symbols will help you find the right garment. They are used as guides in the product descriptions contained in this brochure. The following definitions apply:

 Classic cotton	 Anti Odour	 Quick Drying
 Compression	 Breathable	 Leather
 Merino wool/Wool	 Insulating	 Registered Community Design (RCD) or national design registrations.
 Electrically heated	 Moisture Wicking	 Patented in select countries across Europe and world wide.

Gloves

 Conductive material for easy use of smartphone.	 Heat protection	 Isolated
 Cut protection	 Knuckle protection	 Oil protection
 Waterproof	 Impact protection	
 Wind protection	 Comfortable leather	

Washing

 Handwash	 Do not tumble dry	 Iron at maximum 150°C
 Maximum washing temp. 40°C	 Tumble drying normal temp	 Iron at maximum 200°C
 Maximum washing temp. 60°C	 Drying flat drip	 Do not dry clean
 Maximum washing temp. 70°C	 Do not iron	 Dry cleaning
 No Bleach	 Iron at maximum 110°C	

Washing advice.

Keep clean to satisfy the standard. And to increase the product's service life.

Your workwear and PPE garments must always be clean to be safe and satisfy the standard. Garments covered in dirt will significantly decrease visibility and other properties and may thereby put you in danger. Frequent washing will also help materials last much longer since dust and dirt may destroy fibres by abrasion. A longer service life for the product is good for both your finances and the environment. The flame and heat protection in protective clothing made of fabrics with inherent flame-resistant properties cannot be washed or worn out. In fact, regular washing ensures that the garments do not contain any dirt or flammable particles that will compromise the protective properties.

Washing machine.

- Read and follow the washing instructions on the garment's care label.
- Make sure to close all zippers, (press) buttons, hook and loop fasteners, etc. and turn the garment inside out before putting it in the washing machine to prevent damage to the fabric.
- When washing garments with reflective details (reflective stripes etc.), you should always wash the garments inside out. The reflectivity of any reflective material will be reduced every time garments are washed without being turned inside out. Note that damage to the flame-retardant, visibility or reflective properties of the material may not be visible to the naked eye.
- Fill the washing machine to reduce the number of washing cycles.

Detergents.

- Use organic detergent that is friendly to the environment and your skin to prevent skin irritation.
- Use special wool detergent for woollen garments.
- Do not use more detergent than necessary in order to protect the environment and the fabrics and to avoid lumps of detergent on your clothes.
- Do not use softener, as it may reduce the performance of the fabric as well as contain many hazardous chemicals that are not always listed on the label.
- Softener and soap-based detergents should always be avoided when washing PPE garments as they leave traces of either fat/grease from soap or chemicals that could counteract the properties of the fabrics.

Temperature.

If the clothes are only slightly dirty, use lower temperatures in order to save energy and protect the fabrics. Washing at 40 degrees instead of 60 degrees saves almost 50 per cent energy.

Drying.

- Insofar as is possible, dry outside in the air or on a drying rack. However, certain garments must be tumble dried at a high temperature to retain their properties – read the label carefully.
- When using a dryer, do not use a higher temperature than necessary in order to save energy, avoid shrinkage and protect the fabrics.
- Do not let the garments stay in the washing machine after washing, hang them on a drying rack immediately in order to prevent creases.

Materials.

- To protect fabrics, reflective tapes and prints, turn the garments inside out before washing them.
- Wool is a natural product that can keep itself clean; it does not need to be washed as often as cotton or man-made materials.
- The garment's care instructions should be followed particularly carefully when washing rainwear. Some rainwear has sealed tapes that can be damaged during wash and dry cycles, and other rainwear garments must be tumble dried or ironed to renew the water resistance.

Never mix certified and non-certified garments.

You should never mix certified garments with non-certified garments in the same wash, since non-certified garments may bleed colours and/or chemicals that will damage the certified garments.

Damaged garments.

If the garment has been exposed to chemicals or heat/flame, it must be carefully examined to make sure that the fabric is undamaged. If a certified garment needs to be repaired, you must only use approved/certified materials and fabrics.

The best materials from the strongest brands.

The right clothing is crucial for a safe and efficient workday. And in order for a garment to function optimally for a specific area of use, it must be made of materials with the right properties. Often several different materials are combined to create the best possible garment. In our quest to design innovative, high-quality workwear, we collaborate with many industry-leading manufacturers of technical fabrics and materials.

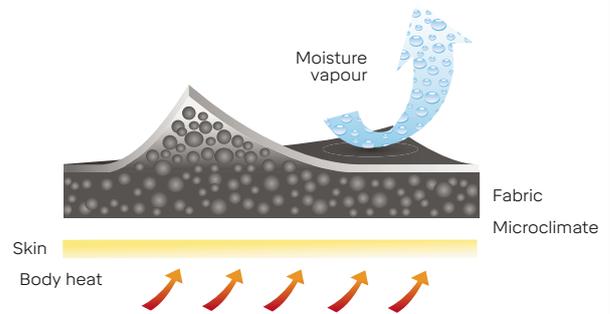

37.5® Technology

37.5® Technology regulates your body's microclimate, to help create an optimal working environment within your clothing. By actively responding to your body's natural humidity and infrared energy (IR), patented active particles embedded in the material removes moisture in the vapor stage to help keep you dry. If you get cold, these same active particles capture and return that IR energy to help warm you up.

37.5® fibers are also available with enhanced biodegradation. With very few end-of-life options for textiles available, enhanced biodegradation offers a step in the right direction in the work of improving waste management. 37.5® fibers with enhanced biodegradation accelerate the natural degradation process when placed in landfill conditions. These fibers are also recyclable and are converted to naturally occurring materials so they do not contribute to problem with microplastics. 37.5® is a trademark of Cocona Labs.

Read more about the technology and test results on snickersworkwear.com.

Armortex®

Armortex is a DuPont™ Kevlar® fiber used to help provide strength, flexibility, and lightweight protection in everything from yarns and woven ballistic fabrics to ropes and apparel. It's lightweight, durable and extraordinarily strong and used to make a variety of clothing, accessories, and equipment safe and cut resistant.

Belltron™

Belltron™

Belltron™ offers excellent static control performance by blending small amounts of Belltron™ into the primary fiber of choice. Belltron™ controls static electricity regardless of environment. It has consistent antistatic properties even in absolutely dry conditions.

Belltron™ is not a laminated fiber, but rather a polyester or nylon fiber containing continuously-embedded anti-static particles. No carbon particles can be removed from Belltron™ by rubbing. The static control property is applied inside the fiber, there for Belltron™ maintains an extremely stable performance even after washing.

Belltron™ is a trademark of KB SEIREN, LTD.

BCI

The Better Cotton Initiative (BCI) — a global not-for-profit organisation — is the largest cotton sustainability programme in the world. BCI exists to make global cotton production better for the people who produce it, better for the environment it grows in and better for the sector's future. BCI aims to transform cotton production worldwide by developing Better Cotton as a sustainable mainstream commodity. Farmers who grow Better Cotton commit to grow cotton in line with Better Cotton principle, which covers the following areas: minimising the harmful impact of crop protection, water stewardship, caring for soil health, fibre quality, biodiversity and responsible land use and decent work.

CORDURA®

An extremely tough and hardwearing material, used to reinforce exposed parts such as pockets, knees and sleeves. It is also water and dirt repellent, easy to care for and retains its shape.

It is a high technology fabric made with air-textured polyamide fibres able to meet the toughest standards of strength and durability.

CORDURA® is a trademark of INVISTA Inc.

D3O®

D3O® smart materials specialise in impact protection and shock absorption. Its unique patented polymer composites contains a chemically engineered dilatant as an energy absorber. The material's molecules flow freely in standard conditions, but on impact, they lock together to absorb and disperse energy, before instantly returning to their flexible state. This unique characteristic provides enhanced impact protection, while providing versatile and flexible materials that can be manufactured for a host of impact protective applications. Note: D3O® does not "go hard".

Snickers Workwear uses different D3O® material grades specially tuned for a wide range of temperatures that offer enhanced cushioning, long-term comfort and superior impact protection on key contact areas.

GRS

The Global Recycled Standard (GRS) is an international, voluntary, full product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices, and chemical restrictions. The standard helps consumers gain more confidence in recycled content product claims. Learn more at GlobalRecycled.org

Heat Ready®

Heat Ready® is a groundbreaking heating solution, featuring the worlds thinnest heating panels.

Inuheat One is the hub of the Heat Ready ecosystem. The smart electronics allow you to have and control the active heat in all different Heat Ready products. The concept of a battery for several different applications is recognizable from, for example, modern hand tools available today.

Hipora®

Hipora® is a waterproof and breathable membrane used for gloves. It keeps your hands dry and comfortable.

Hipora® is a trademark of Kolon Industries.

LYCRA® T400®

LYCRA® T400® fibre provides excellent performance and aesthetics in applications that require low to moderate stretch. It's a multi-component yarn in which different polymers are joined together within each filament. When exposed to heat, each polymer shrinks to a different degree, producing a smooth helical crimp. Because the crimp is not mechanically induced, the stretch and recovery of LYCRA® T400® fibre is greater and more durable than those of textured yarns. 18% of the polymer is made using renewable plantbased material for a more sustainable lifestyle.

OEKO-TEX®

The OEKO-TEX® label indicates the additional benefits of tested safety for skin-friendly clothing and other textiles.

The International OEKO-TEX® Association is an independent test institute, testing textiles for harmful substances according to OEKO-TEX® Standard 100 for textile products of all types which pose no risk whatsoever to health.

Protal®

Protal provides the most comfortable and cost-effective garment solutions for flame retardant and multi-hazard PPE (personal protective equipment) end uses. Utilising a unique blend of Protex Q, cotton and other technical fibres, Protal is used to produce knitted and woven garments that are worn daily by hundreds of thousands of end users worldwide from oil and gas to utility and military.

Offering exceptional performance, including electric arc protection, Protex Q fibre is the only modacrylic which has been specifically designed for PPE use and is Oeko-tex Class 1 compliant and REACH ready. All Protal garments include the very latest generation Protex Q fibre blends manufactured by only the very best technical textile producers in the world.

Polartec® Fleece Series

In 1981, Polartec® became the first to knit, nap, and shear synthetic yarns into thermal fabric for outdoor apparel. The Polartec® synthetic fleece fibres were engineered for more versatile durability. With greater resiliency, lightweight warmth and fast drying times, Polartec® fleece remains the industry standard for outerwear performance. Polartec® fleece comes in Micro, 100, 200 and 300 weights.

Polartec® Shed Less Technology

Discover the innovation behind Shed Less Technology, which combines advancements in yarn construction, knitting, chemistry, and manufacturing processes. This groundbreaking approach reduces fiber shedding by up to 85% during home laundering, minimizes loose fibers, and ensures fibers resist breaking over time. Now, you can enjoy the original look, feel, and performance you trust, with the added benefit of longer-lasting durability and less shedding.

Polartec® Power Stretch®

Polartec® Power Stretch® is a performance-fit fabric platform that raises the bar for stretch fabric capabilities. Advanced dual-surface knit construction gives Power Stretch® enough tensile strength for durable shape recovery. Performance wicking abilities mean it keeps up with any activity.

Polartec® Thermal Pro®

A cutting-edge fibre composition known for its outstanding insulation, thermoregulation, and breathability properties. Crafted with premium polyester yarns, this technically advanced fabric boasts exceptional functionality, durability, and a soft touch.

PrimaLoft Gold Aerogel

Originally developed for space exploration, PrimaLoft Gold Aerogel is an ultralight, efficient insulation material that provides exceptional thermal protection. Its waterproof, windproof, and lightweight properties make it ideal for applications like the Power Pocket, which shields cell phones and extends battery life in cold conditions.

REPREVE®

As part of our continuous sustainability work, we have upgraded some of our styles with REPREVE®, the world's number-one brand of recycled performance fibre. In order to make sustainable claims reliable, the REPREVE® fabric is verifiable through the U-Trust® Verification program. This means the fibre contains the unique FiberPrint® tracer technology and the fabric is analysed to validate REPREVE® content claims and composition.

Schoeller®

Schoeller® is an elastic wind- and water-repellent softshell fabric that makes for the perfect companion for all your outdoor activities. Different bonded layers of elastic fabric ensure maximum function and are extremely comfortable to wear. No matter what you love to do, Schoeller® is with you all the way, guaranteeing effective weather protection and maximum freedom of movement.

Sorona®

The Sorona® fibre offers environmental benefits and great performance. Sorona® has a unique PTT molecular structure designed for maximising performance and provides stretch without spandex. 37% of the polymer is made using renewable plant-based material for a more sustainable lifestyle. The fibre is an eco-efficient performance fibre that also offers exceptional softness and a rich feel for day-in, day-out comfort. Garments featuring the Sorona® fibre retain their shape and resist bagging for maximum comfort on the move.

Thinsulate™

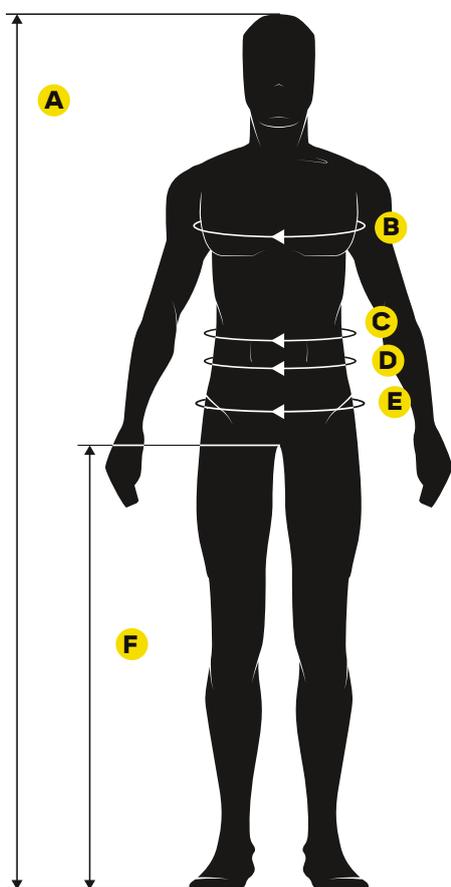

Thinsulate™

Thinsulate™ insulation has very high insulation properties compare to its weight. The fine fibres that make up Thinsulate™ insulation, work by trapping air molecules between you and the outside. The more air a material traps in a given space, the better it insulates you from the cold outside air. Thinsulate™ is breathable, moist-resistant and machine washable. Thinsulate™ is a trademark of 3M™.

Measure right — for a good fit.

Carefully follow our measuring tips below to make sure you get the right size. Snickers Workwear keeps all standard sizes in stock for speedy deliveries (see specific garment for the standard size range). We also offer special sizes — delivery may take a little longer, but it's well worth it. Outside sizes are available to order with 50% extra surcharge.

A. Body length.

Top of the head to the sole of the foot.

B. Chest.

Chest width, horizontally at the widest place.

C. Waist.

For One-Piece Trousers, Overalls and Jackets.
Waist width horizontally at navel height.

D. Lower waist.

For Trousers.
Lower waist width at the place you wear your trousers.

E. Seat.

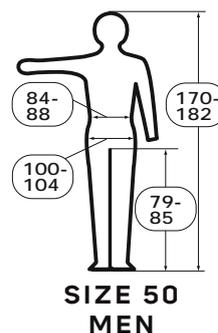

Seat width, horizontally at the widest place.

F. Inside leg.

Crotch to the sole of the foot. Extremely important measurement to ensure the kneepads end up in the right position.

Important measurement tips.

1. Get help from someone to take your measurements.
2. Take measurements dressed in body-tight underwear.
3. Measure tight against/around your body, but without the measuring tape being pulled so hard that it “cuts” in.
4. When measuring the inside leg, make sure the measuring tape is firmly extended.

Every CE-marked garment has to have a label with a pictogram that shows the size and the body measurements of the person that the garment is intended for. This means that you always can check inside the garment to see the size.

Getting the right size.

1. Choose the right size chart below:

3XXX for 3-series trousers

6XXX for 6-series trousers

2. Look for your body measurements in the chart and choose the corresponding size.

3. To ensure an optimal fit – try them on for real!

All measurements are body measurements.

* **Closest corresponding jeans size.** Sizes within the blue frame are Standard Stock Items which are available for most of our Trousers - see specific garment for current size range. SHORTS are available in Regular length. PIRATES are available in Short and Regular lengths.

MEN'S ONE-PIECE TROUSERS

IMPORTANT: It is important that you take into consideration your full waist measurement (C) when choosing the size of one-piece trousers. You may need a bigger size in one-piece trousers compared to on-the-waist trousers to make sure there is enough space for your stomach.

E	Your Inside Leg	41	44,5	48	51,5	55	58,5	62	65,5	69	72	75	78

Please note! JACKETS and TOPWEAR are in double sizes, i.e. 98/104, 110/116 etc.

Headwear

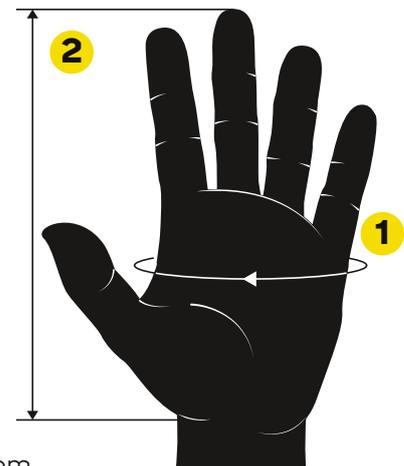

YOUR SIZE	S	M	L	
Your Head circumference in cm measured at widest point	CM	56–58	58–60	60–62

Gloves

Always choose gloves with the right finger length. Try them on to find the right one.

YOUR SIZE	7	8	9	10	11	
1 Hand circumference	MM	178	203	229	254	279
2 Hand length	MM	171	182	192	204	215
Minimum length of glove*	MM	230	240	250	260	270

* If the glove is made for a specific application, it is possible to depart from the requirements of minimum glove length if it is stated in the user guide.

Get the right size. Use our size generator at snickersworkwear.com

Ensure you get optimally fitting garments
 – **Try them on for real!**

A. Body length.

Top of the head to the sole of the foot.

B. Chest.

Chest width, horizontally at the widest place.

C. Waist.

For One-Piece Trousers, Overalls and Jackets.
 Waist width horizontally at navel height.

D. Lower waist.

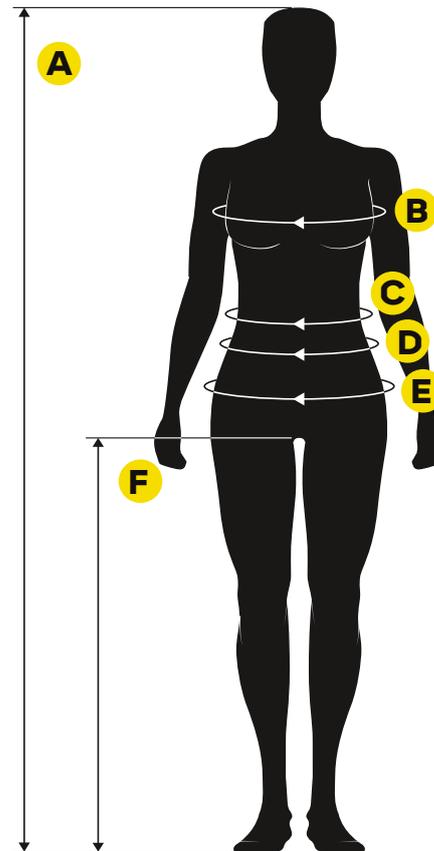

For Trousers.
 Lower waist width at the place you wear your trousers.

E. Seat.

Seat width, horizontally at the widest place.

F. Inside leg.

Crotch to the sole of the foot. Extremely important measurement to ensure the kneepads end up in the right position.

Workwear that fit the female form.

Our workwear is purposefully built to meet the specific needs of your job. And that's just as true for our women's workwear as for everything else we make. Functionality and durability where you need it, and comfort and fit where you demand it. And that of course also means that our women's workwear is specifically designed for the female anatomy. Trousers that are wider at the hips, and tops that are narrower at the waist, all for an optimal fit and efficient ergonomics.
